Argument Structure:

Argument Structure Douglas N. Walton, 1996 Provides a systematic survey clarification and assessment of the different tests currently used to carry out tasks involved in argument identification and presents new methods for determining missing premises determining whether an argument is linked or convergent and deciding whether a given test of discourse contains an argument or not For courses in informal logic critical thinking argumentation and logical reasoning Also of interest to those in speech communication rhetoric discourse analysis and education Annotation copyrighted by Book News Inc Portland OR

Preferred Argument Structure John W. Du Bois, Lorraine Edith Kumpf, William J. Ashby, 2003-01-01 Preferred Argument Structure offers a profound insight into the relationship between language use and grammatical structure In his original publication on Preferred Argument Structure Du Bois 1987 demonstrated the power of this perspective by using it to explain the origins of ergativity and ergative marking systems Since this work the general applicability of Preferred Argument Structure has been demonstrated in studies of language after language In this collection the authors move beyond verifying Preferred Argument Structure as a property of a given language They use the methodology to reveal more subtle aspects of the patterns for example to look across languages diachronically or synchronically to examine particular grammatical relations and to examine special populations or particular genres This volume will appeal to linguists interested in the relationship of pragmatics and grammar generally in the typology of grammatical relations and in explanations derived from data and corpus based approaches to analysis

Argument Structure and Syntactic Relations Maia Duguine, Susana Huidobro, Nerea Madariaga, 2010-07-14 The topic of this collection is argument structure The fourteen chapters in this book are divided into four parts Semantic and Syntactic Properties of Event Structure A Cartographic View on Argument Structure Syntactic Heads Involved in Argument Structure and Argument Structure in Language Acquisition Rigorous theoretical analyses are combined with empirical work on specific aspects of argument structure The book brings together authors working in different linguistic fields semantics syntax and language acquisition who explore new findings as well as more established data but then from new theoretical perspectives The contributions propose cartographic views of argument structure as opposed to minimalistic proposals of a binary template model for argument structure in order to optimally account for various syntactic and semantic facts as well as data derived from wider cross linguistic perspectives

The End of Argument Structure María Cristina Cuervo, Yves Roberge, 2012-04-17 A central question in the study of language concerns the mechanisms by which the participants in an event described by a sentence come to occupy their positions and acquire their interpretation The papers included in this volume explore current issues and re assess generally accepted premises on the relationship between lexical meaning and the morphosyntax of sentences by confronting two competing approaches to this issue A long standing approach is based on the assumption that it is the lexical meaning of a verb that determines albeit indirectly the basic properties of sentence structure at the level of verbal meaning including

asymmetric relations thematic roles case and agreement An alternative approach claims that to a large extent the syntax itself establishes possible verbal meanings on the basis of the legitimate relations that can exist between syntactic heads complements and specifiers Amharic Catalan Chamorro Chukchee English Georgian Inuit Korean Malagasy Slovenian and Spanish are among the languages used to provide empirical evidence and illustrate the argumentation Contributors are Victor Acedo Matellan Grant Armstrong Mark Baker David Basilico Mar a Cristina Cuervo E Matthew Husband Kyumin Kim Terje Lohndal Tatjana Marvin Jaume Mateu Mercedes Pujalte Yves Roberge Andr s Saab and Lisa Travis

Argument Structure: James B. Freeman, 2011-03-23 This monograph first presents a method of diagramming argument macrostructure synthesizing the standard circle and arrow approach with the Toulmin model A theoretical justification of this method through a dialectical understanding of argument a critical examination of Toulmin on warrants a thorough discussion of the linked convergent distinction and an account of the proper reconstruction of enthymemes follows

Argument Structure and Linking Stephen Wechsler, 1991

Constructions Adele E. Goldberg, 1995-03-15 Drawing on work in linguistics language acquisition and computer science Adele E Goldberg proposes that grammatical constructions play a central role in the relation between the form and meaning of simple sentences She demonstrates that the syntactic patterns associated with simple sentences are imbued with meaning that the constructions themselves carry meaning independently of the words in a sentence Goldberg provides a comprehensive account of the relation between verbs and constructions offering ways to relate verb and constructional meaning and to capture relations among constructions and generalizations over constructions Prototypes frame semantics and metaphor are shown to play crucial roles In addition Goldberg presents specific analyses of

several constructions including the ditransitive and the resultative constructions revealing systematic semantic generalizations Through a comparison with other current approaches to argument structure phenomena this book narrows the gap between generative and cognitive theories of language Argument Structure Jane Barbara Grimshaw,1992

Argument Structure is a contribution to linguistics at the interface between lexical syntax and lexical semantics It formulates an original and highly predictive theory of argument structure that accounts for a large number of syntactic phenomena The main analytical focus is on passives nominals psychological predicates and the theory of external arguments In the course of Argument Structure Jane Grimshaw suggests that contrary to the prevailing view argument structure is in fact structured it encodes prominence relations among arguments which reflect both their thematic and their aspectual properties The prominence relations support a new theory of external arguments with far reaching consequences for the syntactic behavior of predicates and the nature of cross categorial variation in argument structure Jane Grimshaw is Associate Professor of Linguistics and Cognitive Science at Brandeis University **The Syntax of Argument Structure** Leonard H. Babby,2009-03-26 This book proposes an intriguing theory of argument structure Babby puts forward the theory that this set of arguments the verb s argument structure has a universal hierarchical composition which directly determines the sentence s case and grammatical relations Argument Structure Jane Barbara Grimshaw,1990 Argument Structure is a contribution to linguistics at the interface between lexical syntax and lexical semantics It formulates an original and highly predictive theory of argument structure that accounts for a large number of syntactic phenomena The main analytical focus is on passives nominals psychological predicates and the theory of external arguments In the course of Argument Structure Jane Grimshaw suggests that contrary to the prevailing view argument structure is in fact structured it encodes prominence relations among arguments which reflect both their thematic and their aspectual properties The prominence relations support a new theory of external arguments with far reaching consequences for the syntactic behavior of predicates and the nature of cross categorial variation in argument structure Jane Grimshaw is Associate Professor of Linguistics and Cognitive Science at Brandeis University **Dialectics and the Macrostructure of Arguments** James B. Freeman,1991 No detailed description available for Dialectics and the Macrostructure of Arguments *Arguments as Relations* John Bowers,2010-07-30 A radically new approach to argument structure in the minimalist program In Arguments as Relations John Bowers proposes a radically new approach to argument structure that has the potential to unify data from a wide range of different language types in terms of a simple and universal syntactic structure In many ways Bowers s theory is the natural extension of three leading ideas in the literature the minimalist approach to Case theory particularly Chomsky s idea that Case is assigned under the Agree function relation the idea of introducing arguments in specifiers of functional categories rather than in projections of lexical categories and the neo Davidsonian approach to argument structure represented in the work of Parsons and others Bowers pulls together these strands in the literature and shapes them into a unified theory These

ideas together with certain basic assumptions notably the idea that the initial order of merge of the three basic argument categories of Agent Theme and Affectee is just the opposite of what has been almost universally assumed in the literature lead Bowers to a fundamental rethinking of argument structure He proposes that every argument is merged as the specifier of a particular type of light verb category and that these functional argument categories merge in bottom to top fashion in accordance with a fixed Universal Order of Merge UOM In the hierarchical structures that result from these operations Affectee arguments will be highest Theme arguments next highest and Agent arguments lowest exactly the opposite of the usual assumption Linguistic Inquiry Monographs 58 *The Syntax of Argument Structure* Leonard Harvey Babby, 2009

derivational or representational minimalist or cartographic is entirely up for grabs This is what makes a book like the present one equivalent to a murder thriller one cannot finish one chapter without wanting to read the next While the solution to the underlying mystery remains as open as it ever was the clues offered here seem just impossible to ignore

Crosslinguistic Perspectives on Argument Structure Melissa Bowerman, Penelope Brown, 2007-10-16 This book offers a unique interdisciplinary perspective on argument structure and its role in language acquisition Drawing on a broad range of crosslinguistic data this volume shows that languages are much more diverse in their argument structure properties than has been realized The volume is the outcome of an integrated research project and com
