Architecture Of Reform:

Irving Gill and the Architecture of Reform Thomas S. Hines, Irving Gill, 2000 Hines places his work within an international context as Gill's identification with the modern movement developed his work evolved from the influence of the East Coast Shingle Style and Wright's Midwest Prairie Style to become closer in spirit to the work of the Austrian Adolf Loos. Gill and Loos were both admired by the second generation modernists Rudolph Schindler and Richard Neutra who studied under Loos in Vienna and learned from Gill in Los Angeles. Hines also explores the social dimensions of Gill's work.

Designing Reform Cole Roskam, 2021-11-30 Investigating the rich architecture of post Mao China and its broad cultural impact. In the years following China's Cultural Revolution, architecture played an active role in the country's reintegration into the global economy and capitalist world. Looking at the ways in which political and social reform transformed Chinese architecture and how in turn architecture gave structure to the reforms, Cole Roskam underlines architecture's unique ability to shape space as well as behavior. Roskam traces how foreign influences like postmodernism began to permeate Chinese architectural discourse in the 1970s and 1980s and how figures such as Kevin Lynch, I. M. Pei, and John Portman became key forces in the introduction of Western educational ideologies and new modes of production. Offering important insights into architecture's relationship to the politics, economics, and diplomacy of post Mao China, this unprecedented interdisciplinary study examines architecture's multivalent status as an art, science, and physical manifestation of cultural identity. **Revolt**

and Reform in Architecture's Academy William Richards, 2016-12-01 *Revolt and Reform in Architecture's Academy* uniquely addresses the complicated relationship between architectural education and urban renewal in the 1960s, which paved the way for what is today known as public interest design. Through an examination of curricular reforms at Columbia University's and Yale University's schools of architecture in the 1960s, this book translates the urban crisis through the experiences of two influential groups of architecture students as well as their contributions to design's lexicon. The book argues that urban renewal and campus expansion half a century ago recast architectural education at two schools whose host cities, New York and New Haven, were critical sites for political, social, and urban upheaval in America. The urban challenges of that time are the same challenges rapidly growing cities face today: access, equity, housing, and services. As architects, architects in training, and architecture students continue to wrestle with questions surrounding how design may serve a broadly defined public interest, this book is a timely assessment of the forces that have shaped the debate. **The**

Architecture of Reform Cary I. Sneider, Jacqueline Barber, Lincoln Bergman, 1997 *The architecture of social reform*

Isabel Rousset, 2022-06-07 *The architecture of social reform* explores the fascinating intellectual origins of modern architecture's obsession with domesticity. Copiously illustrated, Rousset's revealing analysis demonstrates how questions over aesthetics, style, urbanization, and technology that gripped the modernist imagination were deeply ingrained in a larger concern to reform society through housing. The increasing demand for new housing in Germany's rapidly growing cities

fostered critical exchanges between a heterogeneous group of actors including architects urban theorists planners and social scientists who called for society to be freed from class antagonism through the provision of good modest traditionally minded domestic design Offering a compelling account of architecture s ability to act socially the book provocatively argues that architectural theory underwent its most critical epistemological transformation in relation to the dynamics of modern class politics long before the arrival of the avant garde

Form and Reform in Architecture Bertram Hume,1954 This book explains and discusses the theory of design in architecture with particular reference to the ideas which have most influenced it within the last hundred years and are most current to day The impact of power driven machinery upon design provides Bertram Hume with his starting point he describes its effect upon designers and the various expedients they adopted in their efforts to deal with a new situation Since any reliable architectural historian must also be something of a sociologist he does not neglect the many larger issues brought about by changes in society These lead him into a consideration of such concepts as the Marxist theories of the organisation of society the claims of the Town Planners and the philosophy behind the founding of the Garden Cities Mr Hume writes clearly and forcefully avoiding the jargon of the technician and the art critic but Form and Reform in Architecture is not like so many books of the past decade propaganda for a particular school of thought Instead it sets out to consider impartially the claims put forward by various schools of design past and present so that the reader may thread his way through the labyrinth of conflicting hypotheses and assertions put forward to day and perhaps for the first time feel equipped to exercise his judgment upon them from dust jacket
