Contemporary Issues in Business Ethics Joseph R. DesJardins, John J. McCall, 1985 *On Ethics and Economics*
Kenneth J. Arrow, 2016-08-25 Part intellectual autobiography and part exposition of complex yet contemporary economic ideas this lively conversation with renowned scholar and public intellectual Kenneth J Arrow focuses on economics and politics in light of history current events and philosophy as well Reminding readers that economics is about redistribution and thus about how we treat each other Arrow shows that the intersection of economics and ethics is of concern not just to economists but for the public more broadly With a foreword by Amartya Sen this book highlights the belief that government can be a powerful force for good and is particularly relevant in the current political climate and to the lay reader as well as the economist Business and Economic Ethics Arthur Rich, 2006 This book is a fundamental and unique masterpiece which reflects the discussions on business and economic ethics over decades in German speaking countries and does so by systematically developing an Ethics of Economic Systems from a Christian theological perspective with a firm foundation in the western philosophical and economic literature Neither in German speaking nor English speaking regions has this complex theme been dealt with in such a comprehensive and thorough manner Ethics is a matter of doing justice to the human without twisting the facts and ignoring the constraints The study introduces seven criteria of human justice that fundamentally relate to the Christian revelation and at the same time establish a humanistic and universal approach Subsequently it focuses on the concrete economic systems and their problems It describes and analyses various models of market and centrally planned economies and evaluates them in the light of middle level principles which are informed by both ethical criteria and economic knowledge Thus the most legitimate economic system is the one which offers the most potential for reforms and self critique The merits of this approach are considerable if the system of the market economy has the advantage of being thoroughly reformable it also requires regulations which are equitable and responsible In this view one better understands the inescapable failure of Marxism but also the ethical ramifications of savage deregulations Arthur Rich 1910 1992 was Professor of Systematic Theology and Director of the Institute of Social Ethics at the University of Zurich Switzerland He worked in the field of business and economic ethics for nearly 40 years Georges Enderle is Arthur and Mary O Neil Professor of International Business Ethics at the Mendoza College of Business University of Notre Dame Indiana USA and President of the International Society of Business Economics and Ethics 2001 2004 which organizes the ISBEE World Congress of Business and Economic Ethics every four years *The Political Economy of Business Ethics in East Asia* Ingyu Oh, Gil Sung Park, 2016-09-28 The Political Economy of Business Ethics in East Asia A Historical and Comparative Perspective

deals with modes of ethical persuasion in both public and private sectors of the national economy in East Asia from the periods of the fourteenth century to the modern era. Authors in this volume ask how and why governments in pre-modern Joseon Korea, modern Korea, and modern Japan used moral persuasion of different kinds in designing national economic institutions. Case studies demonstrate that the concept of modes of exchange first developed by John Lie (1992) provides a more convincing explanation on the evolution of pre-modern and modern economic institutions compared with Marx's modes of production as historically specific social relations or Smith's free market as a terminal stage of human economic development. The pre-modern and modern cases presented in this volume reveal that different modes of exchange have coexisted throughout human history. Furthermore, business ethics or corporate social responsibility is not a purely European economic ideology because manorial, market, entrepreneurial, and mercantilist moral persuasions had widely been used by state rulers and policymakers in East Asia for their programs of advancing dissimilar modes of exchange. In a similar vein, the domination of the market and entrepreneurial modes in the twenty-first century world is also complemented by other competing modes of change such as state welfarism, public sector economies, and protectionism. Compares Chinese, Japanese, and Korean business ethics from a comparative and historical context. Explores recent theoretical approaches to capitalist development in modern history in non-Western regions. Discusses the theoretical usefulness of new institutionalism, modes of exchange, and neoclassical discussions of business ethics. Evaluates historical texts in their own languages in its attempt to compare Chinese, Japanese, and Korean business ethics in the pre-modern and modern times.

The Three Economic Enlightenments Paolo Santori, 2025-12-31. When people wonder about the appropriate course of action in a given situation, they are already engaging in moral reasoning. This also applies to the field of business, where an understanding of ethics could help businesspeople and market participants make morally informed decisions. This book aims to enlarge the body of ethical theories available in Business Ethics by illustrating three moral principles relevant to economic agents based on the ideas of Immanuel Kant, Antonio Genovesi, and Adam Smith. All three authors were prominent figures in the eighteenth-century European Enlightenment movement and have much to teach us about the origins of modern economics. Additionally, the book provides specific examples relating to contemporary business situations, focusing on the ethical challenges posed by incomplete contracts. Overall, this book demonstrates that the historical evolution of economic and philosophical concepts remains pertinent to current dialogues in Business Ethics.
