leadership and practice the place of values and human subjectivity in our accounts of educational organizations the nature of educational policy and the conduct of research Knowing Educational Administration surveys and analyzes all of the most important theories in the field However as differences among these theories reflect ultimately different philosophical positions the book offers a new philosophical perspective on educational administration For administrative theories to count as sound knowledge they must meet the demands of our best theories of knowledge The book outlines and defends a particular coherentist view of knowledge and then uses that view both to criticize existing administrative theories and to develop a distinctive alternative The alternative is a new postpositivist science of administration which is able to include ethics and subjectivity within the scope of sound administrative knowledge

Starratt, 2003-04-02 In this book Starratt enters the national conversation among educational administration scholars and practitioners about what constitutes the core of their knowledge and practice In Part I he develops three main themes cultivating meaning community and moral responsibility which he then positions against national themes about the core of educational administration school improvement democratic community and social justice Rather than focusing on the routine managerial tasks normally associated with school administration budgeting personnel and legal problems time and resource management etc this text asks aspiring school leaders to reflect first on the underlying philosophical and sociological perspectives that constitute the substance of administrative work in education Centering Educational Administration

provides A Unique Perspective on Leadership The author views leadership as organically related to teaching and learning as concerned with internal capacity building in response to state imposed accountability pressures and as an existential process of writing one s autobiography through their day to day work An Interdisciplinary View of Educational Administration Centering Educational Administration asks educational administrators to bring contemporary philosophical ethical and anthropological issues as well as learning theory social theory and political theory into their thinking about the daily operation of the school A Unique Perspective on School Improvement This text asserts that school improvement narrowly defined as improving results on high stakes tests can likewise place the nation at risk An equally important agenda is teaching the young the basic satisfactions norms and potential of using their knowledge in the service of the community and of a wider humanity Exercises in Reflective Practice This book challenges the reader to use the ideas of each chapter to analyze the current practices in their school and to propose concrete changes to improve the teaching and learning environment of their school
