Hill,2011-06-30 A brief impactful book that provides a contemporary analysis of how economics and social class affects the concept of family today This book focuses on the impact of economic systems and social class on the organization of family life Since the most vital function of the family is the survival of its members the author give primacy to the economic system in structuring the broad parameters of family life She explains how the economy shapes the prospects families have for earning a decent living by determining the location nature and pay associated with work The Stem Family in Eurasian Perspective Antoinette Fauve-Chamoux,Emiko Ochiai,2009 Is the Asian stem family different from its European counterpart This question is a central issue in this collection of essays assembled by two historians of the family in Eurasian perspective The stem family is characterized by the residential rule that only one married child remains with the parents This rule has a direct effect upon household structure In short the stem family is a domestic unit of production and reproduction that persists over generations handing down the patrimony through non egalitarian inheritance In spite of its ambiguous status in current family typology as something lurking in the valley between the nuclear family and the joint family the stem family was an important family form in pre industrial Western Europe and has been a focus of the European family history since Fr d ric Le Play and more recently Peter Laslett However the encounter with Asian family history has revealed that many areas in Asia also had and still have a considerable proportion of households with a stem family structure The stem family debate has entered a new stage In this book some studies that benefited from recently created large databases present micro level

analyses of dynamic aspects of family systems while others discuss more broadly the rise and fall of family systems past and present A main concern of this book is whether the family type in a society is ethno culturally determined and resistant to changes or created by socio economic conditions Such a comparison that includes Asian countries activates a new phase of the discussion on the stem family and family systems in a global perspective Shifting the Center Susan J.
