**Politics Without Sovereignty** Christopher Bickerton, Philip Cunliffe, Alexander Gourevitch, 2006-12 Written by leading scholars this volume challenges the recent trend in international relations scholarship the common antipathy to sovereignty The classical doctrine of sovereignty is widely seen as totalitarian producing external aggression and internal repression Political leaders and opinion makers throughout the world claim that the sovereign state is a barrier to efficient global governance and the protection of human rights Two central claims are advanced in this book First that the sovereign state is being undermined not by the pressures of globalization but by a diminished sense of political possibility Second it demonstrates that those who deny the relevance of sovereignty have failed to offer superior alternatives to the sovereign state Sovereignty remains the best institution to establish clear lines of political authority and accountability preserving the idea that people shape collectively their own destiny The authors claim that this positive idea of sovereignty as self determination remains integral to politics both at the domestic and international levels

*Contemporary Religious Studies in China* Xinping Zhuo,2020-04-30 It is a spectacular history since the founding of the PRC When looking back to the history we realize the huge accomplishment of the contemporary China and the remarkable spirit of Chinese people Just as that in other branches the achievements of contemporary Chinese academic development are fully manifested in the research and results of contemporary Chinese religious studies Therefore there is special academic value and practical significance for the development and the future of our religious studies to reexamine this period of history and explore how contemporary Chinese scholars think about it During the academic development of contemporary China religious studies be come one of the most developed and popular as well as controversial subjects This is because religious studies have been situated in a complex background and it is difficult to have a well situated position with broad spectrums and sensitive questions Hence religious studies belong to the subjects that are growing The understanding of its connotation and extension is still on the way The full development of religious studies as a discipline will represent the real leap of Chinese religious studies **How China's Rise is Changing the Middle East** Anoushiravan Ehteshami,Niv Horesh,2019-07-09 This book explores the extent to which China s rise is changing the economic security political and social cultural aspects of the Middle East a region of significant strategic importance to the West and of increasing importance to the East With its growing dependence on Middle East oil and gas China has more at stake in this region than any other Asian power and not surprisingly has begun increasing its engagement with the region with profound implications for other

Widening the World of International Relations Ersel Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non-Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just meta-theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory
