Contemporary Marriage:

Contemporary Marriage Kingsley Davis, 1986-08-20 This fascinating symposium is based on an assumption that no longer seems to need justification that the institution of marriage is today experiencing profound changes. But the nature of those changes, their causes and consequences, is very much in need of explication. The experts contributing to this volume bring a wide range of perspectives: sociological, anthropological, economic, historical, psychological, and legal to the problem of marriage in modern society. Together, these essays help illuminate a form of relationship that is both vulnerable and resilient, biological and social, a reflection of and an influence on other social institutions. *Contemporary Marriage* begins with an important assessment of the revolution in marital behavior since World War II, tracing trends in marriage, age, cohabitation, divorce, and fertility. The focus here is primarily on the United States and on industrial societies in general. Later chapters provide intriguing case studies of particular countries. There is a recurrent interest in the impact on marriage of modernization itself, but a number of essays probe influences other than industrial development, such as strong cultural and historical patterns or legislation and state control. Beliefs and expectations about marriage are explored, and human sexuality and gender roles are also considered as factors in the nature of marriage. *Contemporary Marriage* offers a rich spectrum of approaches to a problem of central importance. The volume will reward an equally broad spectrum of readers interested in the meaning and future of marriage in our society.

A Cultural History of Marriage in the Modern Age Christina Simmons, 2021-11-18 Spanning cultures across the 20th century, this volume explores how marriage, especially in the West, was disestablished as the primary institution organizing social life. In the developing world, the economic, social, and legal foundations of traditional marriage are stronger, but also weakening. Marriage changed because an industrial wage economy reduced familial patriarchal control of youth and women and spurred demands and possibilities for greater autonomy and choice in love. After the Second World War, when more married women pursued education and employment, and gays and lesbians gained visibility, feminism and gay liberation also challenged patriarchal and restrictive gender roles and helped to reshape marriage. In 1920, most people married for life; in the twenty-first century, fewer marry, and serial monogamy prevails. Marriage is more diverse and flexible in form but also more fragile and optional than it once was. Over the century, control of courtship shifted from parents to youth and friends, as opposed to kin, became more important in sustaining marriages. Dual wage earner families replaced the male breadwinner. Social and political liberalism assailed conservative laws and religious regimes, expanding access to divorce and birth control. Although norms of masculinity and femininity retain huge power in most cultures, visions of more egalitarian and romantic love as the basis of marriage have gained traction, made appealing by the global spread of capitalist social relations and also broadcast by culture industries in the developed world. The legalization of same-sex marriage in over twenty-five nations by 2020 epitomizes a century of change toward a less gender-defined ideal that includes a continued desire for social recognition and permanence. *A Cultural History of Marriage in the*
