

Write a critical appreciation of the following poem. You may be helped by Ruth Pitter's own comment on the poem: "It was written on purpose to be sung, and I venture to hope someone will try to set it. It should at least be spoken aloud and with great energy."

The Swifts

Flying low over the warm roof of an old barn,
Down in a flash to the water, up and way with a cry,
And a wild swoop and a swift turn
And a fever of life under a thundery sky,
So they go, so they go by. 5

And high and high and high in the diamond light,
They soar and they shriek in the sunlight when
heaven is bare,
With the pride of life in their strong flight
And a rapture of love to lift them, to hurtle them
there, 10
High and high in the diamond air.

And away with the summer, away like the spirit of glee
Flashing and calling, and strong on the wing,
and wild in their play, 15
With a high cry to the high sea,
And a heart for the south, a heart for the diamond
day,
So they go over, so go away.

Ruth Pitter

Commentary

Just as with the unseen prose, when responding to poetry you should aim to identify techniques the poet uses and write why and how you think these techniques are effective. In this question you are told that the poem's **aural qualities** are very important, a feature, in fact, since the poet wants it to be set to music. It is therefore the **cadence** and shape of lines, the **sounds of words** and particular sonorous techniques that merit close attention such as **alliteration**, **onomatopoeia**, **assonance**, **rhyme**, **rhythm**. Look for **mimesis**, when the aural quality of words, phrase or lines mimes the poet's intended meaning.

I have set out below one or two features of the poem's techniques together with analytical comments of why such techniques are effective. It is by no means an exhaustive list of comments, just a few examples of the type of analysis that is credited. (A line by line analysis can be a little limiting, but you should certainly try to be as rigorous as possible.)

Line 1: Longer vowel sounds (assonance) suggest the swifts' graceful soaring through the sky. The line is also slow, rhythmically, and is therefore mimetic. This line contrasts sharply with:

Line 2: which contains much shorter vowel sounds and more prepositions. The downward and upward movement is also suggested by the shape of the line, which dips in the middle to name the birds' movement. The rhythm is jaunty and quack and thus too mimes the swifts' fitting movement. So, in two lines, the poet has neatly shown, through aural and sonorous qualities, the two contrasting modes of flight that characterise her subjects.
