Rezensionen wissenschaftlicher Literatur ,2003 **The Teaching Continuum** Emory Giles,2011-02-15 This little book is designed to help instructors become more effective and efficient that is their students will learn more and retain more information resulting in better recall Using the model described in the book will make a huge difference in the amount of information that students both receive and retain both long and short term Much of the teaching in higher education is neither effective nor efficient in terms of student learning One of the reasons is because nearly all higher education instructors have had no training background dealing with how to design teaching so that it delivers competent outcomes In fact they have had no training in how to teach Higher education instructors are hired based on their expertise in one or more subjects with little thought about their teaching ability and training Many higher education instructors base their teaching on one or more of their teachers attempting to teach as their instructors taught This adds up to a vicious circle as their professors likely had no training in teaching either Couple this with the little understanding of how the human brain works to make sense out of the information that students receive it is not surprising to learn that they lose as much as 90 percent of what is covered when they walk out the door of the traditional classroom The model presented in this book addresses the above issues and builds on parts of previous models developed It presents a different approach to teaching that is designed to provide more in depth understanding and recall It does this by focusing on how a student learns thinks and recalls information as well as focusing on the linkage of the design components All in all the model will help new and not so new instructors develop more effective and efficient teaching skills **Resources in Education** ,2001-10 *International Bibliography of Book Reviews of Scholarly Literature Chiefly in the Fields of Arts and Humanities and the Social Sciences* ,2003 Understanding Supervision and the PhD Moira Peelo,2011-01-20 **The British National Bibliography** Arthur James Wells,2009 Boletin Internacional de Bibliografia Sobre Educacion ,2003 Books In Print 2004-2005 Ed Bowker Staff,Staff Bowker, Ed,2004 *Resources in Education* ,1997 **The Effective Special Education Teacher** Laurie Ungerleider DeBettencourt,Lori Howard,2007 The textbook guides special education teachers to success by helping them to develop a professional portfolio while demonstrating evidence of competency in self selected areas e g behavior management collaboration guiding them in writing lessons plans and IEPs offering suggestions on how to choose effective instructional and behavioral techniques including research that supports the methods discussed in the text suggesting websites for further information incorporating reflection journal activities and gives guidance on being evaluated by supervisors Additionally the text features reproducible templates and rubrics that can be used by in the classroom and introduces valuable information to the student teacher about professional and ethical standards in the field of special education publisher website **The Teacher's Guide to Success** Ellen L.
