translation is approached from perspectives of the author the source text the translated texts and the translator Both the parallel model and the comparable model are employed and a multiple complex model of comparison is proposed The research model both quantitative and qualitative is duplicable within other language pairs Apart from the basics of corpus building readers may notice that literary texts offer an ideal context for stylistic research and a parallel corpus of literary texts may provide various observations to the style in translation In this book readers may find a close interaction between translation theory and practice Tables and figures are used to help the argumentation The book will be of interest to postgraduate students teachers and professionals who are interested in corpus based translation studies and stylistics
