Contentious Chinese:

The Routledge Handbook of Chinese Studies Chris Shei, Weixiao Wei, 2021-05-30 This Handbook approaches Chinese Studies from an interdisciplinary perspective while attempting to establish a fundamental set of core values and tenets for the subject in relation to the further development of Chinese Studies as an academic discipline. It aims to consolidate the current findings in Chinese Studies, extract the essence from each affiliated discipline, formulate a concrete set of ideas to represent the Chineseness of the subject, establish a clear identity for the discipline, and provide clear guidelines for further research and practice. Topics included in this Handbook cover a wide spectrum of traditional and newly added concerns in Chinese Studies, ranging from the Chinese political system and domestic governance to international relations, Chinese culture, literature, and history, Chinese sociology, gender, middle class, nationalism, home ownership, dating, and Chinese opposition and activism. The Handbook also looks at widening the scope of Chinese Studies, Chinese psychology, postcolonialism, and China, Chinese science, and climate change, and some illustrations of innovative Chinese Studies research methods. The Routledge Handbook of Chinese Studies is an essential reference for researchers and scholars in Chinese Studies as well as students in the discipline. The Chinese Internet Qingning Wang, 2020-11-01 This book discusses the use of the internet in China, the complicated power relations in online political communications, and the interactions and struggles between the government and the public over the use of the internet. It argues that there is a semi-structured online public sphere in which there is a certain amount of equal and liberal political communication, but that the online political debates are also limited by government control and censorship, as well as by inequality and exclusions, and moreover that the government rarely engages in the political debates. Based on extensive original research and considering specific debates around particular issues, the book analyses how Chinese net users debate about political issues, how they problematize the government's actions and policies, what language they use, what online discourses are produced, and how the debates and online discourses are limited. Overall, the book provides a rich picture of the current state of online political communication in China. [Politicized Medical Dispute Resolution in China](#) Jie Wu, 2024-10-29 This book investigates the politicization process of social dispute resolution and its unintended consequences. Under the context of over 70 percent of China's public hospitals having experienced hospital violence with patients acting violently toward medical workers to express anger, protect their rights, or monetary reasons, the examination of interactions between patients, hospitals, and government representatives in China is based on fieldwork conducted in a Chinese mega city from 2015 to 2017, combining over 700 archival mediation cases, 156 hospital violence cases, and their legal outcomes, and 72 in-depth interviews with patients, mediators, and healthcare professionals. It examines

the rise of mediation and finds how the party state utilizes the traditional mediation channel to address emerging social disputes and the art of persuasion in mediation and finds how political stability and moral concerns influence and shaped their strategies and mediation outcomes The first hand data and valuable archival documents help depict citizens social dispute resolution process and reflect another facet of non electoral political participation in China also enriching the understanding of evolving government strategies in dispute resolution This book is reader friendly and could engage a wide and dynamic audience of researchers healthcare professionals and readers interested in medical sociology regional study or political participation in China

Social Protest in Contemporary China, 2003-2010 Yanqi Tong,Shaohua Lei,2013-11-12

China s economic transformation has brought with it much social dislocation which in turn has led to much social protest This book presents a comprehensive analysis of the large scale mass incidents which have taken place in the last decade The book analyses these incidents systematically discussing their nature causes and outcomes It shows the wide range of protests tax riots land and labour disputes disputes within companies including private and foreign companies environmental protests and ethnic clashes and shows how the nature of protests has changed over time The book argues that the protests have been prompted by the socioeconomic transformations of the last decade which have dislocated many individuals and groups whilst also giving society increased autonomy and social freedom enabling many people to become more vocal and active in their confrontations with the state It suggests that many protests are related to corruption that is failures by officials to adhere to the high standards which should be expected from benevolent government it demonstrates how the Chinese state far from being rigid bureaucratic and authoritarian is often sensitive and flexible in its response to protest frequently addressing grievances and learning from its own mistakes and it shows how the multilevel responsibility structure of the Chinese regime has enabled the central government to absorb the shock waves of social protest and continue to enjoy legitimacy

Unrest in China from the dramatic events of 1989 to more recent stirrings offers a rare opportunity to consider how popular contention unfolds in places where speech and assembly are tightly controlled The contributors to this volume argue that ideas inspired by social movements elsewhere can help explain popular protest in China
