Marx an engineered New Earth Cecelia Tichi or the technological sublime David Nye Not only was America's concept of space paradoxical it has always also been a contested terrain a site of continuous social and cultural conflict Many foundational issues in American history the dislocation of Native and African Americans the geo political implications of nation building immigration and transmigration the increasing division and clustering of contemporary American society etc involve differing ideals and notions of space Quite literally space and its various ideological appropriations formed the arena where America's search for identity national political cultural has been staged If American democracy as Frederick Jackson Turner claimed is born of free land then its history may well be defined as the history of the fierce struggles to gain and maintain power over both the geographical social and political spaces of America and its concomitant narratives The number and range of topics interests and critical approaches of the essays gathered here open up exciting new avenues of inquiry into the tangled contentious relations of space in America Topics include Theories of Space Landscape Nature Technoscape Architecture Urban Utopia Literature Performance Film Visual Arts *The Short Prose Reader* Harvey S. Wiener, 1994 This rhetorically organized student friendly reader includes short essays on a range of topics Each selection is supported by exceptionally thorough and thoughtfully designed editorial apparatus that integrates reading writing and critical thinking The quality variety and number of reading writing and thinking prompts provide students with ample support for reading and writing and can be adapted to a number of teaching approaches **The short prose reader** ,2003
