Dissident cosmologists's guide to the Universe** Victor Christianto, Florentin Smarandache, 2022-09-01 This book is inspired by a German theoretical physicist Sabine Hossenfelder s publication Lost in Mathematics Her book seems to question highly mathematical and a lot of abstraction in the development of physics and cosmology studies nowadays There is clear tendency that in recent decades the physics science has been predominated by such an advanced mathematics which at times sounding more like acrobatics approach to a reality Through books by senior mathematical physicists like Unzicker and Peter Woit we know that the answer of TOE is not in superstring theories or other variations of such 26 dimensional bosonic string theory of which none of those theories survived experimental test but perhaps in low dimensional physics As Alexander Unzicker suggests perhaps it is more advisable to consider rotation in 3D space known as SO3 or a kind of superfluid vortices version of gravitation theory We can also reconsider proposition by the late Prof F Winterberg formerly professor at Univ Nevada Reno that it is most likely that superfluid phonon roton theory in 3D can replace the entire superstring theories While we don t explore yet implications of his model to particle physics we discuss here some published papers at several journals in the past few years
