Bullying and Teasing Gayle L. Macklem, 2012-12-06 Current research demonstrates that bullying affects all children in schools not simply the several students who may be most visibly involved in an individual incident In order to prevent escalation or to stop the action something different must happen The victim or bully must change but this may not be easy Importantly the classmates or the adults who witness the interaction have the power to change the interaction as well Bullying and Teasing Social Power in Children s Groups frames bullying and teasing as part of the critical foundations of elementary and middle school planning that will allow children to experience the sense of personal safety needed to learn and grow Bullying and Teasing is designed for school psychologists and other school mental health workers including school counselors social workers and school nurses who want to address the ways bullying and teasing impact both individual students and the school as a whole The book will also be of interest to school administrators health coordinators special educators and school board members

Internal Game Theory Tassos Patokos, 2013-04-17 Traditional game theory requires at least two individuals This book extends game theory to the inner workings of a single person Using game theory to analyse single individuals makes sense if one thinks of individuals as consisting of two or more relatively autonomous partitions that might have conflicting motives This is not to say that individuals are literally made up from multiple selves it only suffices that we adopt a portrayal of the individual as a multilayered entity or of a dual nature in a manner similar to Adam Smith s depiction of an impartial spectator existing within the individual The notion that individuals may be considered as collections of distinct partitions or sub selves has been challenging writers from diverse fields for many centuries This book breaks new ground in combining psychological with evolutionary game theory making for a highly promising way towards a better understanding of the individual and the development of their behaviour along with the individual s own perceptions on it
