Cartesian Introduction To Philosophy:

A Cartesian Introduction to Philosophy Fred Feldman, 1986

Studies in the Cartesian Philosophy (1902)

Cartesian Meditations Edmund Husserl, 2013-11-11

Section 1: Descartes' Meditations as the prototype of philosophical reflection. I have particular reason for being glad that I may talk about transcendental phenomenology in this, the most venerable abode of French science. France's greatest thinker, René Descartes, gave transcendental phenomenology new impulses through his Meditations; their study acted quite directly on the transformation of an already developing phenomenology into a new kind of transcendental philosophy. Accordingly, one might almost call transcendental phenomenology a neo-Cartesianism, even though it is obliged and precisely by its radical development of Cartesian motifs to reject nearly all the well-known doctrinal content of the Cartesian philosophy. That being the situation, I can already be assured of your interest if I start with those motifs in the *Meditationes de prima philosophia* that have so I believe an eternal significance and go on to characterize the transformations and the novel formations in which the method and problems of transcendental phenomenology originate. Every beginner in philosophy knows the remarkable train of thoughts contained in the Meditations. Let us recall its guiding idea: The aim of the Meditations is a complete reforming of philosophy into a science grounded on an absolute foundation.

Dutch Cartesianism and the Birth of Philosophy of Science Andrea Strazzoni, 2018-11-19 How did the relations between philosophy and science evolve during the 17th and the 18th century? This book analyzes this issue by considering the history of Cartesianism in Dutch universities as well as its legacy in the 18th century. It takes into account the ways in which the disciplines of logic and metaphysics became functional to the justification and reflection on the conceptual premises and the methods of natural philosophy, changing their traditional roles as art of reasoning and as science of being. This transformation took place as a result of two factors: First, logic and metaphysics, which included rational theology, were used to grant the status of indubitable knowledge of natural philosophy. Second, the debates internal to Cartesianism, as well as the emergence of alternative philosophical world views such as those of Hobbes, Spinoza, the experimental science and Newtonianism, progressively deprived such disciplines of their foundational function and they started to become forms of reflection over given scientific practices, either Cartesian experimental or Newtonian.

material objects including the human body Part 3 investigates the moral and social dimensions of the Cartesian mind such as love and virtue Cartesianism and Philosophy of Mind will be of interest to scholars and advanced students working on early modern philosophy and philosophy of mind
