Case Studies in Ethics and HIV Research Sana Loue, Earl C. Pike, 2007-10-05 This book represents the compilation of efforts by researchers across the country each of whom is dedicated not only to the prevention and elimination of HIV infection but also to the conduct of research according to the highest ethical principles The authors of the case studies have graciously agreed to share their experiences in conducting research which raised questions for them and will motivate us to further inquiry and examination The views that are presented in this text are diverse and readers may or may not agree with the analyses of the editor authors or the authors of the case studies We do not aim for agreement among readers but rather the studied analysis of the ethical issues raised in the conduct of HIV research We clearly emphasize the protection of the individuals participating in such research as well as their communities and view research not as an enterprise undertaken by researchers but rather as a negotiated exchange between researchers participants and communities that also involves interplay with funding sources ancillary partners and governments

Ethical Issues in International Biomedical Research James V. Lavery, 2007 Ethical Issues in International Biomedical Research is the definitive book on the ethics of research involving

human subjects in developing countries Using 21 actual case studies it covers the most controversial topics including the ethics of placebo research in Africa what benefits should be provided to the community after completion of a research trial how to address conflicts between IRBs in developed and developing countries and undue inducement of poor people in developing countries Each case is accompanied by two expert commentaries written by many of the worlds leading experts in bioethics as well as new voices with research experience in developing countries No other volume has this scope Students in bioethics public and international health and ethics will find this book particularly useful

Legal and Ethical Regulation of Biomedical Research in Developing Countries Remigius N. Nwabueze,2016-04-22 There has been a rapid increase in the pace and scope of international collaborative research in developing countries in recent years This study argues that whilst ethical regulation of biomedical research in Africa and other developing countries has attracted global attention legal liability issues such as the application of common law rules and the development of legally enforceable regulations have been neglected It examines some of the major research scandals in Africa and suggests a new ethical framework against which clinical trials could be conducted The development of research guidelines in Uganda Tanzania Malawi and Nigeria are also examined as well as the role of ethics committees Providing a detailed analysis of the law of negligence and its application to research ethics committees and their members common law and constitutional forms of action and potential negligence claims the book concludes by suggesting new protocols and frameworks improved regulation and litigation This book will be a valuable guide for students researchers and policy makers with an interest in medical law and ethics bioethics customary law in Africa and regulation in developing countries

Islam and Biomedical Research Ethics Mehrunisha Suleman,2020-07-07 This book is a contribution to the nascent discourse on global health and biomedical research ethics involving Muslim populations and Islamic contexts It presents a rich sociological account about the ways in which debates and questions involving Islam within the biomedical research context are negotiated a perspective which is currently lacking within the broader bioethics literature The book tackles some key understudied areas including role of faith in moral deliberations within biomedical research ethics the moral anxiety and frustration experienced by researchers when having to negotiate multiple moral sources and how the marginalisation of women the prejudice and abuse faced by groups such as sex workers and those from the LGBT community are encountered and negotiated in such contexts The volume provides a valuable resource for researchers and scholars in this area by providing a systematic review of ethical guidelines and a rich case based account of the ethical issues emerging in biomedical research in contexts where Islam and the religious moral commitments of Muslims are pertinent The book will be essential for those conducting research in low and middle income countries that have significant Muslim populations and

for those in Muslim minority settings It will also appeal to researchers and scholars in religious studies social sciences philosophy anthropology and theology as well as the fields of biomedical ethics Islamic ethics and global health **Case Studies in Public Health Ethics** Steven Scott Coughlin, Colin Lionel Soskolne, Kenneth W. and Governance of Biomedical Research Daniel Strech, Marcel Mertz, 2016-05-09 In this book scholars with different disciplinary and national backgrounds argue for possible answers and analyse case studies on current issues of governance in biomedical research These issues comprise among others the research care distinction risk evaluation in early human trials handling of incidental findings nocebo effects cluster randomized trials publication bias or consent in biobank research This book demonstrates how new technologies and research possibilities multiply or intensify already known governance challenges leaving room for ethical analysis and complex moral choices Clinical researchers research ethics committee members and research ethicists have all to deal with such challenges on a daily basis While general reflection on core concepts of research ethics is seldom pointless those confronted with hard moral choices do need more practical and contextualized reflection on the said issues This book particularly provides such contextualized reflections and aims to inform all those who study conduct regulate fund or participate in biomedical research
