[The Cambridge Medical Ethics Workbook](#) Michael Parker, Donna Dickenson, 2001-03-22 This is a case based introduction designed to examine the ethical questions raised by modern medical practice

*Cases in Bioethics from the Hastings Center Report* Carol Levine, Robert M. Veatch, 1982 Case studies of ethical issues based on real events are followed by comments illustrating how people from various ethical traditions and frameworks and from different academic and professional disciplines analyze

the issues and work toward a resolution of the conflict posed. The cases are intended to help the public and professional persons pursue reflective well thought out solutions to real human moral dilemmas using a systematic ethical analysis. There are seven chapters. The case studies in chapter 1 on issues in reproduction treat abortion, population programs, risk taking and birth defects, sterilization and rape. Chapter 2 on patient physician relationships examines homosexuality, choosing a therapy when doctors disagree and faith healing for childhood leukemia. Mental health and medical interventions are the topics of the third chapter. Euthanasia, nurturing a defective newborn, organ donation and family wishes and patient autonomy are examples of topics treated in chapter 4 on death and dying. Chapters 5 and 6 examine human subjects research and the allocation of scarce health resources. The concluding chapter deals with public policy and includes cases on laetrile, baby making, anti aging drugs, drinking on the job and state legislation regarding child passenger protection.

RM *Medical Ethics* Lisa Schwartz, Paul E. Preece, Robert A. Hendry, 2002. During their professional lives as doctors, medical students will regularly encounter ethical problems for which there is no clear cut solution. The high profile given to malpractice cases in the press and the increasing disinclination of patients to accept a paternalistic approach from doctors mean that it is now more essential than ever for medical students to learn to cope with ethical issues early in their careers. This book aims to help the reader steer a path through the often conflicting demands of personal belief, law, professional guidelines, ethical theories and common sense. Practical case histories involving issues such as euthanasia, abortion and informed consent bring the subject to life. Ideal for medical students, it will also be useful to students of nursing and other professions allied to medicine.
