

Cahoot

The Cahoot App Case Study

INTRODUCTION

Lodging service providers need a better way to keep their guests engaged and connected to their communities to improve brand loyalty. It is necessary to find a convenient yet personalized avenue of communication that enables lodges to reach out to their members effectively, share content relevant to their audience, and also give details on upcoming events and room availability to spur action from their members.

Additionally, guests who book lodging accommodation need to be able to view their lodging information with ease. This assures peace of mind and enables guests to plan their stay at the lodge according to room availability. Based on this need, the idea of the Cahoot lodging app came into being.

FEATURES

Cahoot is a lodging app that connects lodging service providers with their guests better than ever before. It streamlines communication between both parties, and comes armed with the following features:

-  **Login via email and password**, including additional options for signing up and retrieving a lost password
-  **Users will choose lodge membership** and therefore will only be able to see information relevant to that lodge
-  **Event notifications** will be sent to users detailing lodge events to generate buzz for the business
-  **Users will be able to add feedback** about the lodging experience to gauge satisfaction and identify areas for improvement
-  **The shop/store feature** will further enable users to buy products via the Cahoot app

Hotel Management. Report on Case Studies Laura Herrmann, 2014-08-05 Seminar paper from the year 2013 in the subject Tourism Hotel Management grade 1.0 Stralsund University of Applied Sciences course Hotel Management language English abstract Nowadays the Internet is the most important source of information and the main channel for buying products. With more than 2.4 billion Internet users worldwide, Internet World Stats 2012 and the highest population penetration in regions that are most relevant for tourism, see figure 1, it seems obvious that the internet has been changing the sector in a crucial way since the 1980s and is still gaining importance. Therefore, it can be considered as one of the most influential technologies that changes the behavior of tourists.

Crnojevac Gugi Karlov an 2010 41 While nowadays about 33% of all hotel rooms are booked via the Internet, Ricca 2011, there is also a trend in the direction of booking directly on hotel websites. Efficiency, quality, and flexibility convince the tourists, although still quite a large number of them ends up actually buying the product or service offline and only using the Internet as a platform for information exchange. But modern technology has not only changed the tourist's behavior; for example, the online search process also becomes longer and longer due to the great number of websites, but also the way tourism product and service providers organize and plan their marketing and communication strategies, as well as how they adapt to constant changes in the needs of customers.
