Case Study Houses Marco Hemmerling, Markus Graf, 2016 The Case Study House program ranks among the most influential and innovative projects in American architectural history of the post war period and has lost none of its fascination even today The experimental designs of renowned avant garde architects such as Richard Neutra Craig Ellwood Raphael Soriano and Eero Saarinen succeeded in presenting unique houses that completely redefined the concept of modern living 0The present publication interprets the Case Study Houses using the new digital tools that architects now have at their disposal and which make the projects accessible in a wholly different way While traditional documentation provides floor plans sections elevations and perspectives we are now achieving new insights into the concepts structure construction design and spatial effects of the houses by using 3D models BIM data and atmospheric visualization as well as advanced image processing It is even possible to download 3D models of some of the houses and try out novel approaches to individual projects Above all the book will serve as an inspiration for new architectural ideas and promote the use of these technologies in the design visualization and realization of such concepts in creative and innovative ways [The Presence of the Case Study Houses](#) , 2004-01-01 Since their origins over half a century ago the Case Study Houses have ranked among the classics of architectural modernism In a journey into the present reality of the Case Study Houses the two authors of this book have systematically visited and photographed the houses and their owners Viewing these projects through the lens not only of practicing architects teachers and critics but also of representatives of Old Europe confronting the achievements of the New World they describe and elaborate the stories of some of the most thrilling residential projects of the last century **Case Study Houses** Elizabeth A. Case Study Houses Elizabeth A. T. Smith, Julius Shulman, Peter Goessel, 2009 Redefining The Modern Home A monumental retrospective of the Case Study Houses program The Case Study House program 1945-66 was an exceptional innovative event in the history of American architecture and remains to this day unique The program which concentrated on the Los Angeles area and oversaw the design of 36 prototype homes sought to make available plans for modern residences that could be easily and cheaply constructed during the postwar building boom The program's chief motivating force was Arts Architecture editor John Entenza a champion of modernism who had all the right connections to attract some of architecture's greatest talents such as Richard Neutra Charles and Ray Eames and Eero Saarinen Highly experimental the program generated houses that were designed to re-define the modern home and thus had a pronounced influence on architecture American and international both during the program's existence and even to this day TASCHEN brings you a monumental retrospective of the entire program with comprehensive documentation brilliant photographs from the period and for the houses still in existence contemporary photos as well as extensive floor plans and sketches Text in English French and German

Case Study Houses 1945-1966 Elizabeth A. T. Smith, 2006 The case study house program Because most opinion both profound and light-headed in terms of post-war housing is nothing but speculation in the form of talk and reams of paper it occurs to us that it might be a good idea to get down to cases and at least make a beginning in the gathering of that mass of material that must eventually result in what we know as house post-war Agreeing that the whole matter is surrounded by conditions over which few of us have any control certainly we can develop a point of view and do some organized thinking which might come to a practical end It is with that in mind that we now announce the project we have called The Case Study House Program The magazine has undertaken to supply an answer insofar as it is possible to correlate the facts and point them in the direction of an end result We are within the limits of uncontrollable factors proposing to begin immediately the study planning actual design and construction of eight houses each to fulfil the specifications of a special living problem in the Southern California area Eight nationally known architects chosen not only for their obvious talents but for their ability to evaluate realistically housing in terms of need have been commissioned to take a plot of God's green earth and create good living conditions for eight American families They will be free to choose or reject on a merit basis the products of national manufacturers offering either old or new materials considered best for the purpose by each architect in his attempt to create contemporary dwelling units We are quite aware that the meaning of contemporary changes by the minute and it is conceivable that each architect might wish to change his idea or a part of his idea when time for actual building arrives In that case he will within reason be permitted to do so Incidentally the eight men have been chosen for among other things reasonableness which they have consistently maintained at a very high level

Mapping the Case Study Houses, 2021 In this paper I detail the process of creating a book titled *The Case Study Houses A Field Guide* a project meant to fill a gap in the scholarship on the Case Study Houses one of the most influential architectural programs of the 20th century I provide an overview of existing scholarship on the program in addition to its shortcomings and how my project addresses these by translating that body of work into an approachable modern yet no less informational format My research process involved concatenating various informational sources into one cohesive whole that provides a standardized presentation of facts about the numerous architecturally significant structures that the program spawned and leveraging Arts Architecture magazine's superb photography to bridge the gap between the enthusiast audience of sixty years ago and the enthusiast audience of today
