renewable energy policies created consumer demand for clean energy and changed the institutional logics of the energy sector Vasi uses quantitative analysis to present the big picture of global wind power development and qualitative research to understand why certain countries are world leaders in wind energy while others are relatively underdeveloped Through interviews with renewable energy professionals and campaigners he shows that environmental groups and activists participated actively in energy policymaking pressured various organizations to purchase wind power and formed new companies that specialized in wind farm development He also demonstrates that environmentalists contributed to wind turbine manufacturing by becoming entrepreneurs innovators and advocates Winds of Change sheds much new light on how wind energy is adopted and why and demonstrates how activists and social movements can contribute to the creation of new industries
