Mass Intellectuality of the Neoliberal State Nicolas Fleet, 2021-07-19 This book addresses the political effects of the massification of higher education and intellectual labor in the neoliberal state Using the case of Chile the author argues that public professionalism emerges in the mass university system producing excesses of knowledge which infuse the state with political purpose at many levels The emergence of the student movement in 2011 then the major social mobilization against the neoliberal state since the restoration of democracy in 1990 provided a clear manifestation of the politicization and ideological divisions of the mass university system In conditions of mass intellectuality public professionals mobilize their political affinities and links with society eventually affecting the direction of state power even against neoliberal policy Through several interviews with academics public professionals and other documentary and statistical analyses the book illustrates the different sites of political socialization and the ideological effectiveness of the emergent mass intellectuality of the neoliberal state

A Different Kind of State? Gregory Albo, David Langille, Leo Panitch, 1993 The organization of the public sphere has become the central political problem of the 1990s Neither the centralized bureaucracies of Eastern Europe nor the liberal pluralist states of the West have been able to cope as their citizens demand more public services and greater democratic accountability Increased competitiveness within a free market cannot satisfy these needs if anything it generates more victims dependent on government help This book introduces the possibilities for democratic administration reforming the system of government so as to enhance public participation improve the design of programmes and the delivery of services and to ensure a better working environment within the public sector

Deliberating Environmental Policy in India Sunayana Ganguly, 2015-11-06 As one of the world's largest and most bio diverse countries India's approach to environmental policy will be very significant in tackling global environmental challenges This book explores the transformations that have taken place in the making of environmental policy in India since the economic liberalization of the 1990s It investigates if there has been a slow shift from top down planning to increasingly bottom up and participatory policy processes examining the successes and failures of recent environmental policies Linking deliberation to collective action this book contends that it is crucial to involve local actors in framing the policies that decide on their rights and control over bio resources in order to achieve the goal of sustainable human development The first examples of large scale participatory processes in Indian environmental policy were the 1999 National Biodiversity Strategy Action Plan and the 2006 Scheduled Tribes and Other Traditional Forest Dwellers Act This book explores these landmark policies exploring the strategies of advocacy and deliberation that led to both the successes and failures of recent initiatives

It concludes that in order to deliberate with the state civil society actors must engage in forms of strategic advocacy with the power to push agendas that challenge mainstream development discourses The lessons learnt from the Indian experience will not only have immediate significance for the future of policy making in India but they will also be of interest for other countries faced with the challenges of integrating livelihood and sustainability concerns into the governance process

Private Authority and International Affairs A.
