

# Asymptotic Analysis *of* Differential Equations

Revised Edition

Roscoe B White

Imperial College Press

A phase plane diagram illustrating the asymptotic analysis of differential equations. The plot is divided into two horizontal regions: a black upper region and an orange lower region. The vector field is represented by small white dashes in the black region and black dashes in the orange region. Several trajectories are shown as solid white lines in the black region and solid black lines in the orange region. These trajectories converge towards a point in the black region and then split into two branches that curve downwards into the orange region. The overall appearance is that of a separatrix or a point of bifurcation in a dynamical system.
