

Dilemmas in a General Theory of Planning

Topic: Sociology | Words: 1484 | Pages: 5

Introduction

Although science and engineering professions have developed numerous solutions to many problems, they do not effectively respond to the wicked issues of social or policy planning. In *Dilemmas in a General Theory of Planning*, Horst Rittel and Melvin Webber recognize the emergence of complex societal issues, which are highly resistant to resolutions. In the article, the authors illustrate the distinctive attributes of these problems, which renders the development of ultimate solutions impossible. These challenges are unique, interconnected, and precisely undefinable, lack clear indications of whether they have been addressed, and the proposed solutions cannot be independently or objectively evaluated for their effectiveness. This implies that any recommended strategy can only be assessed as good or bad rather than the scientific and dichotomous classifications of true or false. Within the context of the criminal justice system, such challenges include mass incarceration, war on drugs, and gun control, which are defined by the presence of multiple potential solutions and associated refutations. Although there are no clear-cut solutions, integrating an ethical objective that seeks to benefit the most people can help address these problems.

The Challenge of Wicked Problems

Over the years, social and public policies based on science have not adequately responded to the complex challenges defined by their high resistance to solutions. Rittel and Webber (1973) refer to these issues as
