European Workshop on Microelectronics Education It is a pleasure to present you the Proceedings of the Second European
Workshop on Microelectronics Education and to welcome you at the Workshop The Organising Committee is very pleased
that it has found several key persons with highly appreciated levels of knowledge and expertise willing to present Invited
Contributions to this Workshop We have striven for an interesting spread over important areas like the expected demands for
educated engineers in the wide field of Microelectronics and Microsystems in European industry and beyond and innovations
in method and focus of our educational programmes This is the second European Workshop in this area the first one was held
in Grenoble in France in the spring of 1996 It was the initiative of Georges Kamarinos Nadine Guillemot and Bernard
Courtois to organise this Workshop because they felt that Microelectronics was at a turning point to become the core of the
largest industry in the world and that this warranted a serious re consideration of our educational imperatives It is now two
years since and their feeling has become reality nobody doubts that by the year 2000 the microelecnonics industry will be the
largest industrial sector It is also obvious that because of that and because of the predicted shortfall of educated engineers
we must continuously reconsider the quality of our educational approach Microelectronics and Microcomputer
