Debates in Design and Technology Education Gwyneth Owen-Jackson,2013-08-21

Design and Technology has long held a controversial place on the school curriculum with some arguing that it shouldn't be there at all. This book presents and questions considered arguments and judgements and explores the major issues that all DT teachers encounter in their daily professional lives. In exploring some of the key debates it encourages critical reflection and aims to stimulate both novice and experienced teachers to think more deeply about their practice and link research and evidence to what they have observed in schools. Written by expert design and technology education professionals, chapters tackle established and contemporary issues enabling you to reach informed judgements and argue your point of view with deeper theoretical knowledge and understanding. Debates covered include: What is the purpose of design and technology? Is it a vocational or academic subject? What is the place of design and technology within the STEM agenda? What knowledge and skills do teachers really need? What does the design and technology gender divide mean for schools and pupils? Is it a creative subject? What is the future for design and technology? With its combination of expert opinion and fresh insight, *Debates in Design and Technology Education* is the ideal companion for any student or practising teacher engaged in initial training, continuing professional development or Masters level study.

Learning, Design, and Technology J. Michael Spector, Barbara B. Lockee, Marcus D. Childress, 2023-10-14. The multiple related fields encompassed by this Major Reference Work represent a convergence of issues and topics germane to the rapidly changing segments of knowledge and practice in educational communications and technology at all levels and around the globe.
