Advances in Biosensors Vol.1, b/w Sergey Yurish,2017-07-04 Every research and development in biosensors as well as in any other research fields is started from a state of the art review Such review is one of the most labor and time consuming parts of research especially in high echnological areas as biosensors and chemical sensors It is strongly necessary to take into account and reflect in the review the current stage of development including existing sensing principles methods of measurements technologies and existing devices Many PhD students and researchers working in the same area must make and do it the same type of work A researcher must find appropriate references to read it and make a critical analysis to determine what was done well before and what was not solved till now and determine and formulate his future scientific aim and objectives To help researchers save time and taxpayers money we have started to publish **Advances in Biosensors Reviews Book Series** The 1st volume contains 7 chapters written by 14 authors from 9 countries
