

ing this goal, the authors claim that optimal results are obtained with a manual system that attempts to follow the structure of spoken English. They predict that the use of American Sign Language (ASL) in bilingual or English as a second language (ESL)-type paradigms will be a major focus of investigation in future research. The authors are sure to stimulate discussion with their claim that "no substantial evidence yet exists to support the assertion that ASL is or should be the first language for all deaf children."

This volume succeeds in its stated goal of providing high-level, up-to-date reviews of research and theory in language disorders. It is not intended as a guide to practice, since even the articles that deal with intervention focus on clinical research and the theoretical basis of therapy, rather than on methodology per se. Volume I of *Advances in applied psycholinguistics* represents the most current points of view in the field of disorders of first-language development. It is appropriate and timely reading for advanced undergraduates and graduate students in psycholinguistics, child development, and speech/language pathology.

*Advances in applied psycholinguistics, Vol. 2: Reading, writing and language learning.* Sheldon Rosenberg (Ed.). Cambridge: Cambridge University Press, 1987. Pp. 326.

In the introduction to Volume I of *Advances in applied psycholinguistics*, the editor, Sheldon Rosenberg, mentions the purpose for putting together a collection of chapters on the topic of language disorders. In the introduction to Volume II, a somewhat similar purpose is mentioned for bringing together chapters on reading, writing and second-language acquisition. This volume "should help researchers, teachers, students and practitioners in the many areas of applied psycholinguistics . . . keep abreast of major developments in their areas of interest" (p. vii). Although those interested in applied psycholinguistics might have chosen areas other than or in addition to the ones chosen by Rosenberg, the topics selected for the previous volume and those in this one are clearly central and currently important ones to researchers and practitioners in the field.

One central question addressed by the chapters in this volume is: What kinds of knowledge are used in learning to read and write and to acquire a language? A question related to the first is: How can we best describe the processes of reading, writing, and first- and second-language acquisition? Another question is: How do we teach these processes to learners? A final question is: What further research is needed to find answers to these questions? Not all these questions are equally addressed in each chapter, and the way in which these questions are addressed varies from chapter to chapter. In some instances there are disparate views on issues presented by the different authors. This variance and opposition make the book interesting as well as informative.

Advances in Applied Psycholinguistics Sheldon Rosenberg, 1987     *Recent Advances in the Psychology of Language* R. Campbell, 2013-03-09

The Stirling Psychology of Language Conference was held in the University of Stirling 21-26 June 1976. 250 people attended the conference and 70 papers were presented. The two volumes of Proceedings present a selection of papers from the conference reflecting as far as possible the range of topics that were discussed. Volume 1 is concerned exclusively with language acquisition. In recent years the centre of gravity of acquisition research has shifted from syntactic and phonological description to the amorphous domains of semantics and pragmatics. This shift is reflected in the two large sections II and III devoted to these aspects of language development. In addition the volume contains three smaller sections dealing with general problems of acquisition theory, syntax and the development of comprehension and applied developmental psycholinguistics. Volume 2 contains a substantial section of papers which stress the formal aspects of psycholinguistics; these include papers in which artificial intelligence figures prominently, papers which apply recent developments in syntax and semantics to psycholinguistic problems, and papers that are broadly critical of the use psychologists have made of linguistic theories. Volume 2 also contains a section dealing with the experimental study of sentence comprehension and production and there is a final section concerned with phonology and its development.

Language in Mind Dedre Gentner, Susan Goldin-Meadow, 2003-03-14

The idea that the language we speak influences the way we think has evoked perennial fascination and intense controversy. According to the strong version of this hypothesis called the Sapir-Whorf hypothesis after the American linguists who propounded it, languages vary in their semantic partitioning of the world and the structure of one's language influences how one understands the world. Thus speakers of different languages perceive the world differently. Although the last two decades have been marked by extreme skepticism concerning the possible effects of language on thought, recent theoretical and methodological advances in cognitive science have given the question new life. Research in linguistics and linguistic anthropology has revealed striking differences in cross-linguistic semantic patterns and cognitive psychology has developed subtle techniques for studying how people represent and remember experience. It is now possible to test predictions about how a given language influences the thinking of its speakers. *Language in Mind* includes contributions from both skeptics and believers and from a range of fields. It contains work in cognitive psychology, cognitive development, linguistics, anthropology, and animal cognition. The topics

discussed include space number motion gender theory of mind thematic roles and the ontological distinction between objects and substances Contributors Melissa Bowerman Eve Clark Jill de Villiers Peter de Villiers Giyoo Hatano Stan Kuczaj Barbara Landau Stephen Levinson John Lucy Barbara Malt Dan Slobin Steven Sloman Elizabeth Spelke and Michael Tomasello
