the 23rd Ohio State Denison Conference in May 1996. It also contains articles by some invited mathematicians who could not attend the conference. These peer-reviewed articles showcase the latest developments and trends in classical Ring Theory, highlighting the cross-fertilization of new techniques and ideas with the existing ones. Providing a wide variety of methodologies, this volume should be valuable both to graduate students as well as to specialists in Ring Theory. We would like to thank our colleagues who invested a lot of their time to make the conference a great success. In particular, our thanks go to Professors Tom Dowling, Dan Sanders, Surinder Sehgal, Ron Solomon, and Sergio R Lopez Permouth for their help. The financial support for the Conference provided by the Department of Mathematics, The Ohio State University, and Mathematics Research Institute Columbus is gratefully acknowledged. Many thanks go to Dean Violet I Meek for her commitment to the promotion of research by her continuous encouragement of such efforts and for providing financial support from the Lima campus of The Ohio State University. We have received immense cooperation from all the referees who meticulously and in a very short time provided us with their reports in spite of their busy schedules. We express our sincere thanks to all of them. Finally, we thank Ms Cindy White for her excellent job in typing parts of this volume. We are pleased to dedicate this volume to Professor Bruno J Miiller on the occasion of his retirement for his many contributions to the Theory of Rings and Modules. As this volume was going to press, we have learned that Professor Carl Faith is retiring. This
