Conflict And Reconciliation In Contemporary World:

Conflict and Reconciliation in the Contemporary World David J. Whittaker,2002-03-11 Conflict and Reconciliation in the Contemporary World gives a concise original and multi faceted introduction to the study of modern conflict situations Using eight case studies from four continents Yugoslavia Israel Northern Ireland South Africa El Salvador Cambodia Cyprus and Afghanistan it includes discussion on threatened regional peace and security cycles of internal discord population displacement and violence controversy over causes progress and resolution the value of external mediation enforcement or intervention such as sanctions or punishments means timing and permanence of reconciliation **Handbook on Building**

Cultures of Peace Joseph de Rivera,2008-11-28 Mediation and negotiation personal transformation non violent struggle in the community and the world these behaviors and their underlying values underpin the United Nations definition of a culture of peace and are crucial to the creation of such a culture The Handbook on Building Cultures of Peace addresses this complex and daunting task by presenting an accessible blueprint for this development Its perspectives are international and interdisciplinary involving the developing as well as the developed world with illustrations of states and citizens using peace based values to create progress on the individual community national and global levels The result is both realistic and visionary a prescription for a secure future **Hegel's Critique of Modernity** Timothy C. Luther,2009-01-01 Hegel s

enduring importance lies in the fact that his philosophy sheds light on many contemporary problems his conception of freedom enables us to reconcile many of the differences that divide liberalism and communitarianism While liberalism tends to overemphasize the individual and devalue the community communitarianism tends to do the reverse One of his central aims is to integrate liberalism s concern for the political rights and interests of individuals within the framework of a community He tries to reconcile the individual and community in a way that creates the proper mix of liberty and authority One of Hegel s goals is to discover social structures that will allow individuals to escape the alienation that characterizes contemporary life He sought a method of reconciling his contemporaries to the modern world by overcoming the things that split the self from the social world that is a place where people are at home in the social world A sense of estrangement is all too common even for those who enjoy more personal freedom and material abundance than ever thought possible While Hegel is speaking directly to and about his contemporaries their social world bears much in common with ours Consequently his attempt to reconcile philosophical and social contradictions can elucidate our own condition While the modern world reflects important contributions the advent of modern liberalism leads to excessive individualism that fragments social life leaving individuals disconnected and adrift from meaningful social life The major goal of Hegel s political philosophy is to reconcile the individual with his or her political community in a way that overcomes the alienation of modern life

Restoring Justice and Security in Intercultural Europe Brunilda Pali,Ivo Aertsen,2017-09-14 The intercultural

contexts and new configurations in Europe offer fertile ground for social conflict tensions and threat This book challenges predominant and fear inducing approaches of justice and security as they appear in intercultural contexts and develops alternative understandings by exploring both theoretically and empirically the potential of dialogic and restorative justice oriented actions in sensitive areas of living together The book offers unique opportunities for rethinking frames of justice in security and their intersections and for reshaping European practices and policies in a more sustainable way This book is based on an innovative and exploratory action research project in four European countries which challenges the obsessive focus on security concerns the merging of the security discourse with intercultural contexts and the emphasis on technology and surveillance as a way to conceive the doing of security Both the project and the book offer another vision on what security means and how it can be done by multiplying participatory encounters between different groups in society promoting opportunities for deliberations and dialogue about alternative forms of conviviality The book is one of two volumes resulting from the work by a group of researchers in six European countries having cooperated intensively during four years in ALTERNATIVE an action research project funded under the EU Seventh Framework Programme

The Beginnings of Modern Europe (1250-1450) Ephraim Emerton, 1917 Hospitality and World Politics Gideon Baker, 2013-02-07 A long neglected concept in the field of international relations and political theory hospitality provides a new framework for analysing many of the challenges in world politics today from the search for peaceable relations between states to asylum and refugee crises Bibliographic Guide to Psychology New York Public Library. Research Libraries, 1999 Handbook of Research on Ethnic, Racial, and Religious Conflicts and Their Impact on State and Social Security Alaverdov, Emilia, Bari, Muhammad Waseem, 2021-10-29 The resolution of conflicts based on religious and ethnic contradictions is a time consuming process Under certain conditions a religious conflict became a form of expression of class estate interethnic contradictions and the confrontation of states However we know that all religions call for peace tolerance and understanding There is a need to realize that social injustice inequality and hostility toward any religious and ethnic groups fluctuates depending on the extent to which religious and ethnic differences are linked to economic political or national interests The Handbook of Research on Ethnic Racial and Religious Conflicts and Their Impact on State and Social Security forms a civil position and identity and provides knowledge of the development of conflict preconditions This research explains conflict avoidance and solutions and creates a solid base for ethnic and religious integration while being aware of conflict consequences and avoiding xenophobia Covering topics such as economic crisis radicalization and spiritual security this book is an indispensable resource for students of higher education professors faculty libraries researchers policymakers community leaders human rights activists religious leaders and academicians

Tragedy, Recognition, and the Death of God Robert R. Williams, 2012-09-27 Hegel and Nietzsche are two of the most important figures in philosophy and religion Robert R Williams challenges the view that they are mutually exclusive He identifies four areas of convergence First Hegel and

Nietzsche express and define modern interest in tragedy as a philosophical topic Each seeks to correct the traditional philosophical and theological suppression of a tragic view of existence This suppression of the tragic is required by the moral vision of the world both in the tradition and in Kant s practical philosophy and its postulates For both Hegel and Nietzsche the moral vision of the world is a projection of spurious life negating values that Nietzsche calls the ascetic ideal and that Hegel identifies as the spurious infinite The moral God is the enforcer of morality Second while acknowledging a tragic dimension of existence Hegel and Nietzsche nevertheless affirm that existence is good in spite of suffering Both affirm a vision of human freedom as open to otherness and requiring recognition and community Struggle and contestation have affirmative significance for both Third while the moral God is dead this does not put an end to the God question Theology must incorporate the death of God as its own theme The union of God and death expressing divine love is for Hegel the basic speculative intuition This implies a dipolar panentheistic concept of a tragic suffering God who risks loves and reconciles Fourth Williams argues that both Hegel and Nietzsche pursue theodicy not as a justification of the moral God but rather as a question of the meaningfulness and goodness of existence despite nihilism and despite tragic conflict and suffering The inseparability of divine love and anguish means that reconciliation is no conflict free harmony but includes a paradoxical tragic dissonance reconciliation is a disquieted bliss in disaster *Unesco Yearbook on Peace and Conflict Studies* ,1988

Peace Operations Seen from Below Béatrice Pouligny,2006 In *Peace Operations Seen from Below* Beatrice Pouligny argues that much of what is being rebuilt in societies emerging from war or in some cases what is continuing to be destroyed often lies in the ordinary daily lives of both local populations and the staff of UN missions These on the ground realities are often overlooked by outsiders yet they may prove to be as important as political negotiations at the center debates in the UN Security Council or hearings before an International Criminal Court Central to Pouligny s study is the key role played by local interlocutors Her close analysis of several UN interventions based on first hand observation of how local people intermingle with UN soldiery and civilians sheds light on a neglected but crucial dimension of international peace enforcement BOOK JACKET Reconsideration of Science and Technology III Liu Dachun,Yang Huili,Fan Shanshan,2022-09-30 Drawing on debates from traditional and postmodern thoughts on science and technology the title builds a new theoretical framework to reconsider science and technology integrating the opposing viewpoints that either justify science or negate it As the third volume of a three volume set that proposes to reconsider science and technology and explores how the philosophy of science and technology responds to an ever changing world this final volume seeks to restore the cultural implications of science Across the six chapters the authors probe the prospect of a pluralistic scientific culture including discussions of diversified value choices the tension between reason and unreason other binary characteristics of scientific knowledge including objectivity and uniqueness universality and locality as well as the loss awakening and reconstruction of scientific culture The authors call for a transformation of scientific culture from a dominant culture to an affirmative one and envision a free and

open world of science and technology The volume will appeal to scholars and students interested in the philosophy of science and technology the ideology of scientism and anti scientism modernism and postmodernism Marxist philosophy and topics related to scientific culture

Use of Social Media for Sustainable Peace by Church Pastors of the Nigerian Baptist Convention, 2010-2020 Adebayo Afolaranmi,2023-05-08 Doctoral Thesis Dissertation from the year 2022 in the subject Politics Region Africa language English abstract This research s objective is to critically engage in the study of responses of the Convention s pastors to the actualisation of Goal Sixteen which aims at peaceful and non violent societies The study examined how the Convention s pastors use social media in mediative dialogue to resolve conflicts in building peace in churches The study focused on using social media in mediative dialogue among pastors in Baptist churches within Ibadan city It focused on Facebook Twitter WhatsApp and Telegram Its time frame is 2010 to 2020 It was done through three qualitative research methods sample surveys semi structured interviews and document analysis The study discovers that many Baptist pastors in Ibadan have been using at least a social media platform It reveals that while few pastors consciously use social media to promote sustainable peace and resolve conflicts through mediative dialogue most pastors are sceptical about using social media to resolve conflicts through mediative dialogue While most pastors that use social media use WhatsApp and Facebook many are just migrating to Telegram and few pastors use Twitter The research recommended that governments faith based organisations and pastors of the Convention should deploy social media in the process of mediative dialogue as an instrument for deepening sustainable peace Conflicts in the world impair sustainable peace Conflicts have to be resolved and transformed for peaceful coexistence to achieve one of the seventeen blueprints of the United Nations Sustainable Development Goals peaceful and non violent societies A process of attaining peace is peacebuilding One of peacebuilding means is mediative dialogue Many faith based organisations especially the Nigerian Baptist Convention resolve conflicts among its churches through various means As the world has metamorphosed digitally and social media changes communication means globally using social media in mediative dialogue will likely improve conflict resolution by faith based organisations
