Routledge Handbook of the Global History of Warfare Kaushik Roy, Michael W. Charney, 2024-01-23 This handbook examines key aspects of the development of the global history of warfare and the changing patterns of warfare over time Although scholarship has long eschewed a chronological narrative of the evolution of warfare that privileges the Western experience global histories of warfare have had difficulty avoiding an overemphasis on the West The present volume is a collection of themes rather than a history per se it provides important perspectives on the emergence of warfare as a global historical experience from the ancient past to the present day Drawing together numerous experts it tells a broader more inclusive story of the global human experience with wars and warfare The 35 chapters are organised in eight thematic parts Part I Origins of Warfare Part II Politics and Armed Forces in the Pre Modern Era Part III Steppe Nomads of Eurasia Part IV Naval Warfare and Piracy

in the Pre Industrial World Part V The Impact of Gunpowder Part VI Transition from Industrial to Total War Part VII Wars of Decolonisation and Cold War Part VIII Postmodern New Wars These Parts offer an overview of the global experience of warfare to help readers understand how the wars and the militaries we see today have been shaped by historical developments across the globe This handbook will be of great interest to students of military history naval history strategic studies and world history in general

History of American Foreign Policy, Volume 2 Jerald A Combs, 2017-07-28 First Published in 2017 Now thoroughly updated this respected text provides a clear concise and

affordable narrative and analytical history of American foreign policy from the revolutionary period to the present This is Volume II and is from 1895 The historiographical essays at the end of each chapter have been revised to reflect the most recent scholarship The History of American Foreign Policy chronicles events and policies with emphasis on the international setting and constraints within which American policy makers had to operate the domestic pressures on those policy makers and the ideologies preferences and personal idiosyncrasies of the leaders themselves *Insight Turkey 2018 - Winter 2018 (Vol. 20, No.1)* , Today the world system is in a transition and experiencing a deep international crisis The U S has begun to oppose the basic international institutions such as the United Nations and its subsidiary organs and specialized agencies even though most of these were established with American motivation The hegemon state the U S has been alienating most of its partners and even allies The U S governments have begun to focus on the national setting and to underestimate the international one to favor unilateral policies over multilateral ones The presidency of Donald Trump has expedited this process American rejection of providing global public goods such as international security and free trade has led to a systemic crisis The relative decline of American power coincides with the persistent rise of China Those who claim that the days of Pax Americana are numbered assert that the rise of China will determine the future of the world system China has begun to expand its influence worldwide For this purpose it has established alternative political and economic international institutions such as the Shanghai Cooperation Organization SCO and the Asian Infrastructure Investment Bank AIIB Furthermore China leads the establishment of some other international organizations as well BRICS is only one of these formations challenging the political hegemony of the West led by the U S One of the most promising Chinese projects is the One Belt One Road OBOR Project aspiring to connect the East China to the West the world markets It is expected that on its completion the OBOR Project will take China to the center of the world economy and politics China has been the fastest growing economy in the world for the last thirty years Its share of the world trade has increased dramatically recording the highest share in world exports for several years China has been enjoying economic transactions with all major international actors with more than 200 partners in exports and imports However in terms of per capita income China still lags behind the advanced Western countries Furthermore according to the calculations made by the World Bank and IMF Chinese per capita income is still lower than the world average China recently began to invest in the political and military sphere in the non Western world It has military bases in its near abroad and in the African continent That is Chinese economic influence and technological leadership is supported by its political and military power In spite of the increase in Chinese military and political might it is careful not to challenge the U S and the West There are several reasons for this policy First of all China is aware of its vulnerabilities It suffers some economic and political inconsistencies and weaknesses For instance it has to fortify its regional dominance first in the South China Sea and achieve its longtime one China policy as a precondition for a possible global hegemony Second China wants to win the global rivalry without resorting to war with the current hegemon

Therefore Chinese leaders refrain from opposing the American hegemony politically Even though it has introduced some international institutions the Chinese leadership does not propose a political and diplomatic alternative to the West It will take time for China to offer a full scale global leadership alternative to the world since the global hegemony requires not only economic and military power but also values and norms for cultural hegemony Lastly China is not ready to take the global responsibility since it brings high costs As long as the current American hegemony works in favor of China there is no need for China to change the course of its development In the light of these developments this issue of Insight Turkey focuses on some of the most important topics related to China s persistent rise in the international system More specifically this issue postulates on how to read and understand China s policies towards global powers i e the U S and Russia and regional powers i e India and Turkey Africa has once again returned to the attention of the global powers after being left for many years in the shadow of western politics In recent years Africa has become the center of China s public economic and military diplomacy As it may be expected China s investments in Africa are not totally welcomed by the U S Earl Conteh Morgan in his commentary focuses on the strategic rivalry between China and the U S in Africa Conteh Morgan argues that their rivalry has progressed from mild to intense with both powers increasing their activities on the continent and decreasing Africa s erstwhile marginalization Another rivalry that shapes China s foreign policies in the region is that with India Especially since the Doklam Plateau incident in mid 2017 the expectation of a possible tension between the two regional powers is ever present Taking this into consideration Bruno Ma es in his commentary ponders the economic and strategic rivalry between China and India along with a number of dimensions infrastructure border disputes sea power and trade
