Confronting The Basilisk:

Confronting the Basilisk Mark Hamilton,1993 *Money-maker, Or, The Victory of the Basilisk* Oliver Optic,1874

The World of Meaning Christopher Zurcher,2024-05-22 The meaning of life is something that has puzzled humanity for centuries and continues to inspire contemplation and discussion Near the end of the nineteenth century German philosopher Friedrich Nietzsche predicted that the West's obsession with viewing the world through a scientific lens would eventually lead to the death of God the realization that our religious traditions would not hold up under scientific scrutiny and therefore would become unbelievable This in turn Nietzsche believed would lead to nihilism and a loss of purpose After all without the existence of a transcendent reality what is the point Why continue living Or better yet if there is no God why not do whatever we want whenever we want In a million years what will it matter The World of Meaning attempts to answer these questions by exploring the claim that humans essentially live in two worlds the scientific world of objects and the conceptual world of meaning and although the objective world may be easier to measure scientifically it appears that the world of meaning is our primary reality Through the study of philosophy science and mythology The World of Meaning attempts to prove the existence of this conceptual world and provide us with a blueprint for rediscovering the transcendent as well as the purpose of our lives

Pygmalion's Power Thomas E. A. Dale,2019-10-25 Pushed to the height of its illusionistic powers during the first centuries of the Roman Empire sculpture was largely abandoned with the ascendancy of Christianity as the apparent animation of the material image and practices associated with sculpture were considered both superstitious and idolatrous In *Pygmalion's Power* Thomas E A Dale argues that the reintroduction of architectural sculpture after a hiatus of some seven hundred years arose with the particular goal of engaging the senses in a Christian religious experience Since the term Romanesque was coined in the nineteenth century the reintroduction of stone sculpture around the mid eleventh century has been explained as a revivalist phenomenon one predicated on the desire to claim the authority of ancient Rome In this study Dale proposes an alternative theory Covering a broad range of sculpture types including autonomous cult statuary in wood and metal funerary sculpture architectural sculpture and portraiture Dale shows how the revitalized art form was part of a broader shift in emphasis toward spiritual embodiment and affective piety during the late eleventh and twelfth centuries Adding fresh insight to scholarship on the Romanesque *Pygmalion's Power* borrows from trends in cultural anthropology to demonstrate the power and potential of these sculptures to produce emotional effects that made them an important sensory part of the religious culture of the era
