Routledge Dictionary of Language and Linguistics Hadumod Bussmann, 2006-02-20 The Routledge Dictionary of Language and Linguistics is a unique reference work for students and teachers of linguistics The highly regarded second edition of the *Lexikon der Sprachwissenschaft* by Hadumod Bussmann has been specifically adapted by a team of over thirty specialist linguists to form the most comprehensive and up to date work of its kind in the English language In over 2 500 entries the Dictionary provides an exhaustive survey of the key terminology and languages of more than 30 subdisciplines of linguistics With its term based approach and emphasis on clear analysis it complements perfectly Routledge's established range of reference material in the field of linguistics

Gog of Magog William A. Tooman, 2011 The Gog Oracles Ezek 38 39 reuse of antecedent scripture is crucial to their purpose and meaning The pattern of continuous allusion in the Gog Oracles reflects something more than a writer saturated with scriptural idiom It is a practice of disciplined and deliberate reference to select texts on select themes William A Tooman shows that recognizing the volume and density of scriptural reuse within the Gog Oracles is indispensable for understanding these chapters role within the book its composition and its place within Second Temple literature A close examination of the methods effects and motives of scriptural reuse that are evident within the Gog oracles reveals that these chapters are a unified composition that was crafted as a supplement to a book of Ezekiel in order to fill gaps in the book's message and to harmonize the book with other traditions of prophetic revelation

Subject-oriented Texts Hartmut Schröder, 2011-09-08 No detailed description available for Subject oriented Texts

The Tapestry of Reason Amalia Amaya, 2015-04-30 Although coherence theories of law and adjudication have recently been extremely influential in legal scholarship and have significantly advanced the case for coherentism in law a number of problems remain This the first concerted attempt to develop a coherence based theory of legal reasoning addresses or at least mitigates these problems

Connectedness from Psychological Point of View János S. Petőfi, 1986

The Syntax of Sentence and Text Světlana Mejřková, František Tichá, 1994-01-01 This is a collection of papers inspired by the work of František Danes and is published in honour of his 75th birthday Danes' international contribution to the development of Prague School functionalism the theory of functional sentence perspective discourse studies and semantics is reflected in the 27 papers collected in four thematic sections of this volume

Text Connexity, Text Coherence Emil Sözer, 1985

Discourse Analysis of Biblical Literature Walter Ray Bodine, 1995 In committing themselves to the study of texts linguists have taken a long stride in a literary direction As discourse analysis brings the tools of linguistic analysis to bear on stretches of material larger than the sentence they come into close contact with the artistry of literature In the last third of this century scholars of the Hebrew Bible are gravitating in the same direction Perhaps even more consciously they are studying their texts as literature

Cross pollination between these two groups is now in order. The present volume is intended to help that happen. It originates with biblical scholars and is addressed to our colleagues. Its purpose is to introduce to them the developing field of linguistics known as discourse analysis. In addition to students of the Hebrew Bible, those who study ancient Near Eastern literatures, the New Testament and early Jewish writings should find the following essays immediately relevant. Students of literatures from other times and areas should also be able to benefit because of the pervasive emphasis on methodology.

Preface Text, 1990

Language Typology and Language Universals Martin Haspelmath, 2001

This series of HANDBOOKS OF LINGUISTICS AND COMMUNICATION SCIENCE is designed to illuminate a field which not only includes general linguistics and the study of linguistics as applied to specific languages but also covers those more recent areas which have developed from the increasing body of research into the manifold forms of communicative action and interaction. For classic linguistics there appears to be a need for a review of the state of the art which will provide a reference base for the rapid advances in research undertaken from a variety of theoretical standpoints while in the more recent branches of communication science the handbooks will give researchers both an overview and orientation. To attain these objectives the series will aim for a standard comparable to that of the leading handbooks in other disciplines and to this end will strive for comprehensiveness, theoretical explicitness, reliable documentation of data and findings and up to date methodology. The editors, both of the series and of the individual volumes, and the individual contributors are committed to this aim. The languages of publication are English, German and French. The main aim of the series is to provide an appropriate account of the state of the art in the various areas of linguistics and communication science covered by each of the various handbooks; however, no inflexible pre-set limits will be imposed on the scope of each volume. The series is open-ended and can thus take account of further developments in the field. This conception, coupled with the necessity of allowing adequate time for each volume to be prepared with the necessary care, means that there is no set timetable for the publication of the whole series. Each volume will be a self-contained work complete in itself. The order in which the handbooks are published does not imply any rank-ordering but is determined by the way in which the series is organized. The editor of the whole series enlists a competent editor for each individual volume. Once the principal editor for a volume has been found, he or she then has a completely free hand in the choice of co-editors and contributors. The editors plan each volume independently of the others, being governed only by general formal principles. The series editor only intervenes where questions of delineation between individual volumes are concerned. It is felt that this modus operandi is best suited to achieving the objectives of the series, namely to give a competent account of the present state of knowledge and of the perception of the problems in the area covered by each volume.
