

# Conscientization

- According to Paul Freire,
- The process of developing a critical awareness of one's social reality through reflection and action. Action is fundamental because it is the process of changing the reality.
- Conscientization is a neologism, coming from the Spanish word *conscientización*. It conveys the idea of developing, strengthening, and changing consciousness
- It is not enough for people to come together in dialogue in order to gain knowledge of their social reality. They must act together upon their environment in order critically to reflect upon their reality and so transform it through further action and critical reflection.
