Consciousness And Intentionality Models And Modalities Of Attribution:

Consciousness and Intentionality: Models and Modalities of Attribution Denis Fiset, 1999-09-30 Philosophy of mind has been one of the most active fields in philosophy for the past three decades. One of the most significant factors in the development of this discipline has been the emergence of cognitive science and the interest philosophers have taken in the empirical study of mind. Another equally important factor has been the naturalistic turn brought about by W. V. Quine. His proposal that normative epistemology be replaced by empirical psychology marked a radical departure from the Fregean anti-psychologism and apriorism that had characterized much of the analytic tradition in philosophy. But while Quine's program of naturalization called the attention of philosophers to empirical psychology, his conception of psychology was inspired by an austere behaviorism which shunned the mentalism of intentional psychology in the Brentanian and phenomenological tradition. Thus while agreeing with Brentano that the intentional idiom could not be reduced to that of the natural sciences, Quine argued that it is of a piece with the indeterminacy of translation. Most contributors of this collection share the cognitivist stance and believe that the mind needs to be explained rather than eliminated. Three main questions are actually confronting current philosophers of mind, each addressed by one or another of the contributors to the present collection.

Consciousness and Intentionality Denis Fiset, 2014-09-01 **Consciousness and Mind** David M. Rosenthal, 2005 This volume gathers together the work of David Rosenthal on the philosophical study of consciousness from the past 20 years and represents his theory of consciousness as higher order thought. An introduction draws out the connections between the essays and highlights their implications. **Qualitative Consciousness** Josh Weisberg, 2022-10-20 Qualitative consciousness is conscious experience marked by the presence of sensory qualities like the experienced painfulness of having a piano dropped on your foot or the consciousness of seeing the brilliant reds and oranges of a sunset. Over his career philosopher David Rosenthal has defended an influential theoretical approach to explaining qualitative consciousness. This approach involves the development of two theories: the higher order thought theory of mental state consciousness and the quality space theory of sensory quality. If the problem of explaining qualitative consciousness is divided into two more manageable pieces, the door opens to a satisfying explanation of what is seen by some to be an intractable explanatory puzzle. This interdisciplinary collection develops, criticizes, and expands upon themes inspired by Rosenthal's work. The result is an exciting collection of new essays by philosophers and scientists which will be of interest to all those engaged in consciousness studies. [The Knowledge Argument](#) Sam Coleman, 2019-09-19 A cutting edge and groundbreaking set of new essays by top philosophers on key topics related to the ever influential knowledge argument. [Olfactory Consciousness across Disciplines](#) Benjamin D. Young, 2015-03-05 Our sense of smell pervasively influences our most common behaviors and daily experience, yet little is known about olfactory consciousness. Over the past decade and a half, research in both the fields of Consciousness Studies and Olfaction has blossomed; however, olfactory consciousness has received little to no attention.

The olfactory systems unique anatomy functional organization sensory processes and perceptual experiences offers a fecund area for exploring all aspects of consciousness as well as a external perspective for re examining the assumptions of contemporary theories of consciousness It has even been suggested that the olfactory system may represent the minimal neuroanatomy that is required for conscious processing Given the variegated nature of research on consciousness we include original papers concerning the nature of olfactory consciousness The scope of the special edition widely incorporates olfaction as it relates to Consciousness Awareness Attention Phenomenal or Access Consciousness and Qualia Research concerning olfaction and cross modal integration as it relates to conscious experience is also address As the initial foray into this uncharted area of research we include contributions from across all disciplines contributing to cognitive neuroscience including neurobiology neurology psychology philosophy linguistics and computer sciences It is our hope that this Research Topic will serve as the impetus for future interdisciplinary research on olfaction and consciousness

The Problem of Consciousness Evan Thompson,2003 Contributors to the latest Canadian Journal of Philosophy Supplementary Volume The Problem of Consciousness make connections regarding what is consciousness and how it is related to the natural world The essays in this volume address this question from the perspective of phenomenological philosophy of mind a new trend that integrates phenomenology analytic philosophy and cognitive science The guiding principle of this new thinking is that precise and detailed phenomenological accounts of subjective experience are needed if significant progress is to be made in understanding consciousness and its place in the natural world From this standpoint the essays collected here explore a variety of nuances concerning consciousness including time consciousness perception schizophrenia empathy and intersubjectivity Also addressed are fascinating methodological issues about the relationship between phenomenology and other approaches to understanding the mind in science and philosophy
