Children's Strategies David F. Bjorklund, 2013-05-13 One of the issues central to both classic and contemporary theories of cognitive development is children's goal directed behavior which is typically investigated in terms of strategies This book brings together in one volume the latest research and theory regarding the development of children's strategies for a variety of cognitive tasks Opening with a history of strategy development research and concluding with a chapter that integrates the diversity of ideas expressed by the contributors Children's Strategies offers intervening chapters that examine strategy development for attention analogical reasoning mathematics memory reading and problem solving in infancy Although there is much common ground shared by the various contributors to this volume there is no consensus concerning what exactly a strategy is This mixture of consensus and disagreement reflects both the explosion of research in this area since the late 1960s and the complexity of the issues involved It also reflects the fact that this is a topic that is very much alive in cognitive circles one that will continue to stimulate research for years to come The papers in this volume describe current research and theory concerning the development of children's strategies for handling a variety of cognitive tasks After providing a historical view of the concept of strategies in cognitive development the book highlights many of the issues of concern to contemporary developmental

psychologists interested in strategies The issues discussed include problem solving in infancy memory selective attention mathematics analogical reasoning and reading The Developmental Psychology of Planning Sarah L. Friedman,Ellin Kofsky Scholnick,2014-02-25 Planning is defined as formulating an organized method for action in advance Although people do not plan all the time and planning does not occur in every situation planning skill is central to all human behavior There are developmental differences in planning skill and in the motivation to plan Even among adults variations in the engagement in the planning process are affected by individual attitudes beliefs and goals Planning also has a different meaning at various junctures in one s life Yet despite the amount of research on planning many of the studies have focused only on the cognitive processes that enable mature individuals to plan A continued exploration of the developmental course of planning this text attempts to situate cognitive aspects of planning in the context of the social and cultural environment and other psychological processes Bringing together the contributions of developmental organizational and social psychologists it explains how when and why we plan Finally it addresses various issues that pertain to the different aspects of planning from formal problem solving to handling the demands of everyday life *Handbook of Research on Schools, Schooling and Human Development* Judith L. Meece,Jacquelynn S. Eccles,2010-06-10 Children spend more time in school than in any social institution outside the home And schools probably exert more influence on children s development and life chances than any environment beyond the home and neighbourhood The purpose of this book is to document some important ways schools influence children s development and to describe various models and methods for studying schooling effects Key features include Comprehensive Coverage this is the first book to provide a comprehensive review of what is known about schools as a context for human development Topical coverage ranges from theoretical foundations to investigative methodologies and from classroom level influences such as teacher student relations to broader influences such as school organization and educational policies Cross Disciplinary this volume brings together the divergent perspectives methods and findings of scholars from a variety of disciplines among them educational psychology developmental psychology school psychology social psychology psychiatry sociology and educational policy Chapter Structure to ensure continuity chapter authors describe 1 how schooling influences are conceptualized 2 identify their theoretical and methodological approaches 3 discuss the strengths and weaknesses of existing research and 4 highlight implications for future research practice and policy Methodologies chapters included in the text feature various methodologies including longitudinal studies hierarchical linear models experimental and quasi experimental designs and mixed methods Handbook of Psychology, Developmental Psychology Irving B. Weiner,Donald K. Freedheim,2003-01-03 This work provides an overview of cognitive intellectual personality and social development across the lifespan with attention to infancy early childhood middle childhood adolescence and early middle late adulthood Chapters cover a broad range of core topics including language acquisition identity formation and the role of family peers school and workplace influences on continuity and change over time
