Advances In Cholesterol Research:

Advances in Cholesterol Research Mojtaba Esfahani, John B. Swaney, 1990-08-09 *Advances in Cholesterol Research* presents a range of topics which for the most part have not been reviewed in recent years in books published on cholesterol. The subject area can be divided into two main sections: The intracellular and extracellular dynamics of cholesterol. The intracellular dynamics of cholesterol includes the intracellular distributions of cholesterol, cellular functions of the sterol, cholesterol metabolism in steroidogenic tissues, the cholesterol ester cycle, relation between cholesterol and dolichol biosynthesis, and the role of cholesterol in tumor cell proliferation. The section on extracellular dynamics of cholesterol includes the biogenesis of high density lipoprotein subclasses, structure function relation in lecithin cholesterol acyltransferase, and the role of cholesterol in atherosclerosis and in membrane fusion.
