**Calculus for Executive Decisions** Richard R. Sylvester, 1999-07-01      **Disarmed Democracies** David P.

Auerswald, 2010-04-23 In *Disarmed Democracies Domestic Institutions and the Use of Force* David P Auerswald examines how the structure of domestic political institutions affects whether democracies use force or make threats during international disputes Auerswald argues that the behavior of democracies in interstate conflict is shaped as much by domestic political calculations as by geopolitical circumstance Variations in the structure of a democracy's institutions of governance make some types of democracies more likely to use force than others To test his theory Auerswald compares British French and U S behavior during military conflicts and diplomatic crises from the Cold War era to the present He discusses how accountability and agenda control vary between parliamentary presidential and premier presidential democracies and shows how this affects the ability of the democracy to signal its intentions as well as the likelihood that it will engage in military conflict His findings have implications for the study of domestic politics and the use of force as well as of U S leadership during the next century This study will interest social scientists interested in the domestic politics of international security comparative foreign policy or the study of domestic institutions It will interest those concerned with the exercise of U S leadership in the next century the use of force by democracies and the future behavior of democratizing nations David P Auerswald is Assistant Professor of Political Science and International Affairs George Washington University

*The Law and Economics of Irrational Behavior* Francesco Parisi, Vernon L. Smith, 2005 This collection of essays explores the most relevant developments at the interface of economics and psychology giving special attention to models of irrational behavior and draws the relevant implications of such models for the design of legal rules and institutions The application of economic models of irrational behavior to law is especially challenging because specific departures from rational behavior differ markedly from one another Furthermore the analytical and deductive instruments of economic theory have to be reshaped to deal with the fragmented and heterogeneous findings of psychological research turning towards a more experimental and inductive methodology This volume brings together pioneering scholars in this area along with some of the most exciting developments in the field of legal and economic theory Areas of application include criminal law and sentencing tort law contract law corporate law and financial markets

*The Decision to Attack* Aaron Franklin Brantly, 2016 Brantly investigates how states decide to employ cyber in military and intelligence operations against other states and how rational those decisions are He contextualizes broader cyber decision making processes into a systematic expected utility rational choice approach to provide a mathematical understanding of the use of cyber weapons      *Industrial Engineering*

Prins,1999 Garden of Ruins J. Matthew Ward,2024-05-29 J Matthew Ward s Garden of Ruins serves as an insightful social and military history of Civil War era Louisiana Partially occupied by Union forces starting in the spring of 1862 the Confederate state experienced the initial attempts of the U S Army to create a comprehensive occupation structure through military actions social regulations the destabilization of slavery and the formation of a complex bureaucracy Skirmishes between Union soldiers and white civilians supportive of the Confederate cause multiplied throughout this period eventually turning occupation into a war on local households and culture In unoccupied regions of the state Confederate forces and their noncombatant allies likewise sought to patrol allegiance leading to widespread conflict with those they deemed disloyal Ward suggests that social stability during wartime and ultimately victory itself emerged from the capacity of military officials to secure their territory governing powers and nonmilitary populations Garden of Ruins reveals the Civil War state building efforts and democracy itself as contingent processes through which Louisianans shaped the world around them It also illustrates how military forces and civilians discovered unique ways to wield and hold power during and immediately after the conflict Administrative Law, Third Series ,1989 *Bureaucracy and the Policy Process* Dennis D. Riley,Bryan E. Brophy-Baermann,2006 The central role that bureaucracy plays in the policy process is played by individuals namely by subject matter experts and managers we call political executives The context in which these executives play their roles is defined by three key forces the organizational environ **By Order of the President** Phillip J.
