Chicago's Famous Buildings

A remarkable feature of Chicago's architecture is the use of steel and glass in the construction of its skyscrapers. This is due to the fact that Chicago was the first city to use steel in the construction of a skyscraper, the Home Building, in 1889. The use of steel allowed for the construction of taller buildings that were stronger and more fire-resistant than those made of masonry.

The first use of a structural steel frame in the construction of a skyscraper was in the Home Building in Chicago, which was designed by the architect William LeBaron Jenney.

This picture guide, sponsored by the University of Chicago Press and the Graham Foundation for Advanced Studies in the Fine Arts, is a collection of photographs of the most famous buildings in Chicago, with a brief description of each one. The photographs, in color if possible, are arranged in alphabetical order. The descriptions, written by a group of architects, engineers, and historians, provide a wealth of information about the buildings and the people who designed and built them. The guide is a valuable resource for anyone interested in the history and architecture of Chicago.
