Child In Refusal:

Dealing with Kid's School Refusal Nat Greg, 2022-01-13 School refusal is defined as when a child becomes extremely upset at the prospect of going to school and misses part or all of the school day as a result. About 20 percent of children display behaviors indicative of school refusal at some point during their educational career according to some estimates. School refusal is not a formal psychiatric diagnosis in the traditional sense. It is a term used to describe an emotional and/or behavioral problem. Many parents of teenagers will simply allow their child to miss school rather than discipline him or her. Some other parents have become exhausted by their child and have decided to give up on their child entirely. School refusal is defined as when a child becomes extremely upset at the prospect of going to school and misses part or all of the school day as a result of his or her decision. In most cases, children who refuse to attend school spend the day at home with their parents' knowledge even though their parents try to persuade them to go to school.

Getting Your Child to Say "Yes" to School
Christopher Kearney, 2007-03-22 Many parents find getting their child to school in the morning to be quite a challenge. If your child consistently pleads with you to let him stay home from school, if he skips school, if his morning routine is fraught with misbehaviors, or if he exhibits signs of distress and anxiety related to attending school, this book can help. *Getting Children to Say Yes to School: A Guide for Parents* is designed to help you address your child's school refusal behavior in the early stages. This guide helps you identify school refusal behavior and provides step-by-step instructions to solve the problem. Learn different techniques for getting your child to school, including enhancing relaxation, changing your child's negative thoughts about school, establishing a clear and predictable morning routine, and setting up a system of rewards for going to school. Tools such as worksheets, lists of Dos and Don'ts, sample parent-child dialogues, and Fridge Notes combine to create a workbook-type resource that will help you increase your child's school attendance and relieve your own feelings of concern and worry. Easy to read and filled with concrete strategies, this book is the first of its kind dedicated to educating and arming parents with the tools they need to resolve their child's school refusal behavior.

Helping School Refusing Children and Their Parents Christopher A. Kearney, 2018-02-01 Children who miss substantial amounts of school pose one of the most vexing problems for school officials. In many cases, school personnel must assess these students and successfully help them to return to the academic setting. This can be difficult, considering most school-based professionals are pressed for time and do not have access to proper resources. The information in this book can help school officials combat absenteeism and reduce overall dropout rates. Designed for guidance counselors, teachers, principals, and deans, school psychologists, school-based social workers, and other school professionals, *Helping School Refusing Children and Their Parents* outlines various strategies for helping children get back to school with less distress, all of which can be easily implemented in schools. This fully updated second edition provides recommendations for a multi-tiered approach to school absenteeism that concentrates on prevention: Tier 1 (early intervention for emerging cases), Tier 2 (and more extensive intervention and systemic strategies for severe cases).

Tier 3 with each tier based on empirically supported strategies grounded in scientific research A chapter on assessment describes several methods for identifying school refusal behavior including time limited techniques for school officials who have little opportunity to conduct detailed evaluations Worksheets for facilitating assessment are included and can easily be photocopied from the book Other chapters provide advice for working collaboratively with parents preventing relapse and special issues Topics such as poverty homelessness teenage pregnancy violence and school safety are also addressed as are individualized education or 505 plans and consultation with other clinicians
