Webster's Elementary-School Dictionary Noah Webster,2017-07-21 Excerpt from Webster s Elementary School Dictionary Abridged From Webster s New International Dictionary Rzahzing the importance of this introductory book the editors have studied its problems with the greatest care have consulted with teachers and superintendents as to the proper scope of the vocabulary have sought special help in the selection of the words used in elementary science and technical subjects and have endeavored to learn how best to present a word s meanings to immature minds As a consequence of this study it was decided to limit the vocabulary in size to devote more space to developing a word s meaning Especially by the use of illustrative sentences or phrases to include for the first time in an elementary dictionary discriminated synonyms to give more infor mation than heretofore respecting the spelling of in ected forms such as the plurals of nouns the present and past participles of verbs the cases of pronouns and the comparative and superlative forms of adjectives to show more clearly how one word is connected with another in sentences for examlile the prepositions with which a verb is customarily used and to define the important idiomatic phrases the meaning of which it is often impossible to learn from the ordinary school dictionary Another innova tion is the grouping together of the pictures of certain classes of objects so that the individual differences become more evident In no sense is the elementary school Dictionary a revision of any pre vious work It is

abridged from Webster's New International Dictionary and where possible retains the language of the original definitions but frequent use was made of Webster's secondary school Dictionary where simplification seemed desirable and independent work carried the simplification still further so as to meet the needs of the elementary grades. In plan and presentation therefore the Elementary is entirely new and the illustrative examples especially were studied and chosen from independent sources.
