## **Die Bildhauerin:**

*Dear Friend* Eric Torgersen, 2000-04 In 1908 Rainer Maria Rilke wrote his Requiem for a Friend in memory of Paula Modersohn Becker the German painter who had had a profound effect on him both personally and artistically and who had died a year earlier Modersohn Becker despite being one of the great modern painters is today remembered primarily as she is portrayed in that poem In *Dear Friend* Eric Torgersen looks at the relationship of these two great artists whose vexed seven year friendship was extraordinarily productive for both and offers an introduction to the life and work of Modersohn Becker a gifted and determined woman whose work stands comparison with that of any painter of her day Included in the book are sixteen illustrations as well as new translations by Torgersen of Rilke's Requiem for a Friend and of the love poems Rilke wrote for Becker shortly after they met Torgersen discusses Modersohn Becker's vital paintings including her unfinished portrait of Rilke He quotes extensively from the letters and journals of both figures translating many of Rilke's into English for the first time Finally Torgersen addresses the unanswered question of whether the two were ever lovers and offers new insights into Rilke's writing of Requiem for a Friend Jacket *Case, Word Order and Prominence* Monique Lamers, Peter de Swart, 2011-10-20 Language users have access to several sources of information during the build up of a meaningful construction These include grammatical rules situational knowledge and general world knowledge A central role in this process is played by the argument structure of verbs which establishes the syntactic and semantic relationships between arguments This book provides an overview of recent psycholinguistic and theoretical investigations on the interplay between structural syntactic relations and role semantics The focus herein lies on the interaction of case marking and word order with semantic prominence features such as animacy and definiteness The interaction of these different sorts of information is addressed from theoretical time insensitive and incremental perspectives or a combination of these Taking a broad cross linguistic perspective this book bridges the gap between theoretical and psycholinguistic approaches to argument structure *Die Bildhauerin Clara Rilke-Westhoff, 1878-1954* Marina Sauer, 1986 *Material Modernity* Deborah Ascher Barnstone, Maria Makela, 2022-01-27 *Material Modernity* explores creative innovation in German art design and architecture during the Weimar Republic charting both the rise of new media and the re-fashioning of old media Weimar became famous for the explosion of creative ingenuity across the arts in Germany due to experiments with new techniques including the move towards abstraction in painting and sculpture and inventive work in such new media as paper and plastic which utilized both new and old methods of art production Individual chapters in this book consider inventions such as the camera and materials like celluloid examine the role of new materials including concrete composites in opening up fresh avenues in the plastic arts and relate advances in the understanding of color perception and psychology to an increased interest in visual perception and the latent potential of color as both architectural ornament and carrier of emotional force in space While art historians usually argue that experimentation in the Weimar Republic was the result of an intentional

rejection of traditional modes of expression in the conscious attempt to invent a modern art and architecture unshackled from historic media and methods this volume shows that the drivers for innovation were often far more complex and nuanced It first of all describes how the material shortages precipitated by the First World War along with the devastation to industrial infrastructure and disruption of historic trade routes affected art as did a spirit of experimentation that permeated interwar German culture It then analyzes new challenges in the 1920s to artistic conventions in traditional art modes like painting sculpture drawing architecture textiles and print making and simultaneously probes the likely causes of innovative new methods of artistic production that appeared such as photomontage assemblage mechanical art and multi media art In doing so *Material Modernity* fills a significant gap in Weimar scholarship and art history literature
