subdivide for instance hand is composed of flesh sinews and bones Of animals some resemble one another in all their parts while others have parts wherein they differ Sometimes the parts are identical in form or species as for instance one man s nose or eye resembles another man s nose or eye flesh flesh and bone bone and in like manner with a horse and with all other animals which we reckon to be of one and the same species for as the whole is to the whole so each to each are the parts severally In other cases the parts are identical save only for a difference in the way of excess or defect as is the case in such animals as are of one and the same genus By genus I mean for instance Bird or Fish for each of these is subject to difference in respect of its genus and there are many species of fishes and of birds
