Between Colliding Worlds:

Between Colliding Worlds Jonathan Malloy, Institute of Public Administration of Canada, 2003-01-01 Jonathan Malloy's *Between Colliding Worlds* examines the relationship between governments and external activists through a comparative study of policy units dedicated to aboriginal and women's issues in Australia and Canada. Malloy identifies these units or special policy agencies as sitting on the boundary between the world of permanent public servants and that of collective social movements working for broad social and political change. These agencies at once represent the interests of social movements to government while simultaneously managing relations with social movements on behalf of government and thus operate in a state of permanent ambiguity. Malloy contends that rather than criticizing these agencies for their inherently contradictory nature we must reconsider them as effectively dealing with the delicate issue of bridging social movements with state politics. In other words the very existence of these special policy agencies provides a forum for social movements and the state to work out their differences. Relying heavily on interviews with public servants and external activists Malloy argues convincingly that special policy agencies despite or because of their ambiguous relationship to different communities make critical contributions to governance.

Colliding Worlds Arthur I. Miller, 2014-06-09 A dazzling look at the artists working on the frontiers of science. In recent decades an exciting new art movement has emerged in which artists utilize and illuminate the latest advances in science. Some of their provocative creations a live rabbit implanted with the fluorescent gene of a jellyfish a gigantic glass and chrome sculpture of the Big Bang pictured on the cover can be seen in traditional art museums and magazines while others are being made by leading designers at Pixar Google's Creative Lab and the MIT Media Lab. In *Colliding Worlds* Arthur I. Miller takes readers on a wild journey to explore this new frontier. Miller the author of *Einstein Picasso* and other celebrated books on science and creativity traces the movement from its seeds a century ago when Einstein's theory of relativity helped shape the thinking of the Cubists to its flowering today. Through interviews with innovative thinkers and artists across disciplines Miller shows with verve and clarity how discoveries in biotechnology cosmology quantum physics and beyond are animating the work of designers like Neri Oxman musicians like David Toop and the artists in residence at CERN's Large Hadron Collider. From NanoArt to Big Data Miller reveals the extraordinary possibilities when art and science collide.

Colliding Worlds Simone Marchi, 2021-06-24 Simone Marchi presents the emerging story of how cosmic collisions shaped both the solar system and our own planet from the creation of the Moon to influencing the evolution of life on Earth. The Earth emerged out of the upheaval and chaos of massive collisions in the infancy of the Solar System more than four billion years ago. The largest of these events sent into orbit a spray of molten rocks out of which the Moon coalesced. As in ancient mythological tales this giant catastrophe marks the birth of our planet as we know it. Space exploration has shown that signs of ancient collisions are widespread in the Solar System from the barren and once habitable Mars to the rugged asteroids. On Earth these signs are more subtle but still cataclysmic such as

the massive asteroid strike which likely sparked the demise of the dinosaurs and many other forms of life some 66 million years ago Signatures of even more dramatic catastrophes are concealed in ancient rocks These events wreaked havoc on our planet's surface influencing global climate and topography while also enriching the Earth with gold and other rare elements And recently modern science is finding that they could even have contributed to developing the conditions conducive to life In *Colliding Worlds* Simone Marchi explores the key role that collisions in space have played in the formation and evolution of our solar system the development of planets and possibly even the origin of life on Earth Analysing our latest understanding of the surfaces of Mars and Venus gleaned from recent space missions Marchi presents the dramatic story of cosmic collisions and their legacies

[Tales of Two Cities](#) Sylvia Bashevkin,2011-11-01 In the age of globalization state restructuring is changing the political landscape How does reshaping local government affect citizen involvement in public life As cities move between centralized and decentralized governance and conservative and progressive leadership what brings out the best and the worst in civic engagement In this thought provoking book Sylvia Bashevkin examines the consequences of divergent restructuring experiences in London and Toronto By focusing on the forced amalgamation of local boroughs in Toronto and the creation of a new metropolitan authority in London *Tales of Two Cities* explores the fallout for women as urban citizens Ultimately context is crucial to whether municipal change signals pessimism or promise Clear insightful and prescient *Tales of Two Cities* will appeal to those interested in civic affairs political inclusion and the future of democracy in major urban centres

Educating Religious Education Teachers Jenny Berglund,Bert Roebben,Peter Schreiner,Friedrich Schweitzer,2023-07-10 International knowledge transfer in religious education RE is still a fairly new topic Many scholars in the field consider this discussion of prime importance for the future of both the academic discipline of religious education and the related school subject RE This book continues this discussion and specifies it in the direction of teacher education Its focus is on the challenges that teacher students and their trainers are facing in the light of RE in a pluralized and detraditionalized society The impact of these challenges on RE research is obvious However international exchange of research results for purposes of comparison and mutual enrichment is still rare This book provides insights that can encourage and facilitate this exchange
