

PSYCHOLOGY VERSUS EDUCATIONAL PSYCHOLOGY

PSYCHOLOGY

Scientific study of the human mind and its functions, specifically those that affect human behaviour

Emphasis is the overall scientific study of the human mind, its processes, its relationship and impact on human behaviour

Studies the complexities associated with the human mind that can harm the mental well-being of a person

Main concern is assisting individuals to overcome their psychological issues or issues related to mental health through various psychoanalytical therapies and treatments on the whole

EDUCATIONAL PSYCHOLOGY

A branch of psychology that studies the issues related to education and acquisition of information by humans

Emphasizes more on the understanding and improvement of teaching and learning in formal educational settings

Investigates how students learn and how teachers can help them to learn effectively, especially with regard to students with learning difficulties

Concerns overcoming learning and cognitive difficulties in students as well as in preparing teachers for more effective education

Between Psychology And Education:

Between Psychology and Education David Ellis Hunt, Edmund V. Sullivan, 1974 *The Psychology of Education* Martyn Long, 2000 The Psychology of Education covers the range of contemporary psychological knowledge applied to education Completely up to date and written in an engaging style this book covers the nature of learning techniques of assessment with an emphasis on current developments in the national curriculum recent findings on the impact of differences in individual pupils schools and teachers ways of involving and motivating pupils the importance of social disadvantage and cultural differences of ethnicity and gender in determining attainment the nature of children s language literacy development and the relationship between them behavioural problems and how to deal with them key concepts in special needs and the nature of additional provision Martyn Long encourages teachers to evaluate alternative approaches involved in educational policies and to develop their own teaching methods and whole school principles and procedures The book is illustrated throughout with topical statistics cartoons and empirical material Each chapter includes a summary suggestions for further reading and has a list of key implications which can be applied by students in a problem based scenario There are questions for discussion which are later followed up in the appendix

Education and Psychology in Interaction Brahm Norwich, 2002-11 The author takes an in depth look at how these subjects relate to each other and at the current state of this relationship He develops the theme that despite differences in aims education and psychology are interconnected

Educational Psychology Charles H. Judd, 2012-05-04 No influence has more profoundly affected educational thought and practice during the late 19th and early 20th centuries than the science of psychology This volume discusses the major differences between education prior to the influence of educational psychology and then examines the impact this had on the education of children and the experience of teachers

Psychology Education and Training Rainer Silbereisen, Pierre Ritchie, Janak Pandey, 2014-01-10 Much of the psychological research in the last century has been conducted in the global North West hence many prevailing theories and methodologies reflect the philosophical framework and shared cultural knowledge of this region Other world views and cultural contexts have as yet not had the same opportunity to develop scientific insights that come to the attention of global audiences Psychology Education and Training is the first truly international effort to generate a framework for common standards in psychological education and training across the globe Psychologists have long studied human beings in their socio cultural context New challenges such as globalisation and the relationship of the brain and behavior require that education and training keep pace with these rapidly evolving developments The chapters in this book were generated by an international conference which resulted in the Dornburg Accord While anchored in higher education the focus is on the generative and translational psychological science needed to fulfill psychology s responsibility to society Psychology Education and Training is the first book of its kind to cover both historic strengths and the requirements of emerging fields The book deals with balancing the universalities and cultural

specificities of psychological processes the adjustments to academic curricula required to support national needs as well as the credentials and regulations required to assure the quality of psychological services Psychology Education and Training is unique in providing initial data and concurrent assessment of various components of education and training in psychology across the globe The book is a must for faculty members advanced students of psychology and policy makers who are interested in the issues that shape their societies The Educational Times, and Journal of the College of Preceptors ,1897
