Canadian Art in the

Twentieth Century Joan Murray, 1999-11-01 Canadian Art in the Twentieth Century is a survey of the richest most

controversial and perhaps most thoroughly confusing centuries in the whole history of the visual arts in Canada the period

from 1900 to the present Murray shows how beginning with Tonalism at the start of the century new directions in art

emerged starting with our early Modernists among them Tom Thomson and the Group of Seven Today Modernism has lost its

dominance Artists critics and the public alike are confronted by a scene of unprecedented variety and complexity Murray

discusses the social and political events of the century in combination with the cultural context movements ideas attitudes

and styles the important groups in Canadian art and major and minor artists and their works Fully documented well

researched and written with clarity and over four hundred illustrations in both black and white and colour Murray s book is

essential for understanding Canadian art of this century As an introduction it is excellent in both its scope and intelligence
