**Beyond Trump** Alberto Martinelli, 2017-07-12 Recent political events from Trump s election to the outcome of the Brexit referendum have somehow caught the world by surprise and are contributing to a growing sense of concern or even alarm about the future of the Western world and particularly Western democracies as we know them When looking at the political landscape in Europe populism looks like an unprecedented gamechanger Populists parties are inpower in Poland and Hungary they are in the coalition governments in Switzerland and Finland top the polls in France and the Netherlands and their support is at record highs in Sweden Not to mention the recent rise of Alternative f r Deutschland

in Germany and the successful story of Syriza Podemos and of the Five Stars Movement in Southern Europe The volume explores the rise of populism in Europe and the US by analyzing its root causes and the rationale behind its success It also draws some policy recommendations to tackle the populist challenge

**The Many Faces of Populism**, 2024-12-02 Today more than ever it is easy to understand how populism has become such a contested word in contemporary politics Despite its relatively short history the term follows a rather volatile trajectory in terms of its historical development and presence as a political practice When we look at its political and moral impact one can see that despite its often strict national commitments and narratives populism is rather a global political phenomenon As embodiment of anti establishment narratives polarizing attitudes and emancipatory appeal we can follow its occurrence from Central and Eastern Europe Latin America the USA and UK the Middle East all the way to China and India This edited volume helps fill a gap in the existing literature on Critical Theory broadly construed and populism focusing on the multiple dimensions of historical and contemporary contexts for today's rising populist movements and their often but not necessarily hostile relations towards cosmopolitanism globalization environmentalism and general notions of inclusion and justice Contributors are Emilia Barna Ronald Beiner Dustin J Byrd Samir Ganesha Carlos Antonio Giovinazzo Junior Mlado Ivanovic Yonathan Listik Grigoris Markou Jeremiah Morelock Felipe Ziotti Naritagnes Patakfalvi Czirjok Maria Cristina Dancham Simoes and Hassan Zaheer

*Beyond Trump. Populism on the Rise* A. Martinelli, 2016-12-31

**Beyond Economics** Gary Sauer-Thompson, Joseph Wayne Smith, 1996 This work summarizes an already comprehensive field of criticisms of received economics and advanced new ones particularly with respect to free trade and the industrialisation of economic systems If global economic and ecological catastrophe is to be avoided nations and communities must move towards greater self reliance within the framework of a much less resource wasteful existence But to do this will require not merely a cosmetic change in the present socio economic system but a change of such magnitude that it dwarfs previous social transformations in human history This great transformation must occur by conscious human activity and it must occur quickly if human civilizations and indeed human life itself is to continue

**Beyond Populism** Edward Joseph Quish, 2019 Emerging from a critique of the concept of populism in contemporary democratic theory this dissertation develops a theory of radical democracy based on the politics of cooperative movements I argue that cooperative politics help to clarify a central concern for democratic theory that is often obscured by theories of populism how the popular sovereign can develop a form of social interdependence that facilitates their free and equal participation in self government Working through a political history of cooperative movements in the United States from the Civil War to the Cold War my study traces a series of reformulations of the ideal of the cooperative commonwealth beginning with the Populist movement and extending through the Socialist Party and the work of John Dewey and W E B Du Bois In the end I argue that cooperative politics requires combining the local work of voluntary cooperation in multiple sites of self organization with efforts to forge alliances among the popular classes centered on a non exploitative

vision of cooperative interdependence Such a vision must clarify that cooperation is not simply shared instrumental activity but a form of free association in which participants personal autonomy is secured by sharing in the inherently collective work of social reproduction Cooperative movements reveal how the difficulty of achieving such cooperation is not a natural feature of human sociality but an organizational defect of capitalist societies Today the project of cooperative democracy does not require an abstract blueprint for the cooperative commonwealth but an archive of lessons based on the history of cooperative struggles

*Americas Quarterly*, 2008 **Not A Normal Country** Geoff Andrews, 2005-07-20 Not a Normal Country explores Italian politics and culture in the era of Silvio Berlusconi Italy's richest man and one of its longest serving prime ministers Geoff Andrews argues that the Berlusconi phenomenon was a populist response to widespread cynicism towards politics Berlusconi posed as an anti politician and based his appeal on his virtues as a salesman rather than a statesman The second part of the book discusses the varied opposition to Berlusconi This ranges from the anti global demonstrations in Genoa in 2001 to unconventional protests such as the Girotondo movement led by the film director Nanni Moretti According to Andrews this new associationism has helped rebuild Italian politics Finally Andrews looks to the future and through the examples of anti mafia protests in Sicily as well as opposition to the Americanisation of Italian culture considers the prospects for the new post Berlusconi Italy

The last half of the 20th century is unquestionably the first period in human history during which the agenda absorbing our attention has been dominated by one question the survival of the human species This question casts the darkest shadow on all other preoccupations and concerns Slowly at first but quite evidently by the 1960s we became aware that humanity could be exterminated and civilization destroyed if a nuclear war World War III occurred In the last twenty years another threat to our survival as a species again the awareness developed slowly took hold the ecological collapse of the planet Thus the survival of humanity a practical task became for me an all embracing occupation This task however required not only the questioning of the dominant institutions and the society that had put in place a system that was drifting and pushing itself towards nuclear war and ecocide but also the formulation of how these same institutions and society could be renovated as a requirement to reversing this situation Thus difficult theoretical investigations and discussions could not be closed This intellectual task could not however delay an immediate setting off down the road to the survival of the human species To turn back because of the lack of a theoretical basis would mean compromising humanity s future Hence movement became crucial the movement of people wanting change in large groups or small Movement was the condition wherein a dialectic between the practical and a reflection on experience would nourish theory Since the 1960s we can only be impressed at the outpouring of people into movement s The closest observation analysis and interacting with this profound historical process was the rationale for the founding of the journal Our Generation Against Nuclear War later to become Our Generation and for my role as editor organiser      **The Sweep of American History** Robert Rivers Jones,Gustav L.
