Environmental Risk and the Press Peter M. Sandman, Michael Greenberg, David B. Sachsman, Toxic spills acid rain poor air quality scarcely a day goes by without a report in the press on an environmental risk issue Nowhere is this more prevalent than in New Jersey a leading

state in the production of chemicals and the state with the largest number of Superfund cleanup sites How accurate and how extensive is environmental risk reporting in the New Jersey press and what can be done to improve the quality of its coverage of environmental risk And what can we learn from the New Jersey experience Environmental Risk and the Press sets out to answer these questions The authors explore the strengths and weaknesses of environmental risk reporting in New Jersey by evaluating the state's best environmental risk stories They find that even the best stories have a number of problems and they develop a number of concrete recommendations for reporters and editors on how to improve their coverage in this area The authors also investigate the feasibility of various methods for getting environmental risk information to reporters and into their newspapers They recommend three ways to improve the quality of environmental risk information available to journalists The first is nationwide distribution of environmental press kits that include a directory of news sources a glossary of technical terms and briefings by experts on strategies for covering particular types of environmental risk situations The second is continuing education programs on environmental risk for reporters and editors The third is creating collections of relevant reference books in the offices of newspapers and broadcast stations The authors report on initial actions taken to implement these recommendations and plans for others They conclude that the broader availability of environmental risk information to the media will result in better reporting of environmental problems This book is a first step toward enhancing journalists' appreciation of the importance of risk as an issue in environmental news coverage and providing them with the tools to help them act upon that heightened awareness

Beyond Malice Richard M. Clurman, 1988-01-01 The national news media as now practiced were born in the 1950s revealed their strength in the 1960s Vietnam asserted it in the 1970s Watergate and were hammered for it in the 1980s By the mid and late 1980s after historic libel suits with the press knocking off presidential candidates and Supreme Court nominees unraveling the Reagan presidency and in a position to overwhelm any individual or institution a new era in press-public tension had arisen from the depths of America's civic religion fair play In this account of the media mandarins' rise to uneasy domination Richard M. Clurman gives an intimate critical report of the media in the 1980s the stormiest years in press history until the present time and a harbinger of the present day Beginning with the invasion of Grenada he takes his readers event by event through the biggest uproars in history raising questions from both the media's and the public's perspective on the key troubling press issues of our time Why is the press accused of being so negative so biased so left-wing so anti-establishment Whenever people read or see something they know about why is it so often wrong naive unfair or all of the above Why do the media arrogantly try to tell people what to think Is there no line between privacy and the people's right to know How can the public and government answer back after the media have spoken Using the Westmoreland v CBS and the Sharon v Time trials as emblematic of how things go wrong the author draws graphic lessons for improved press conduct and wiser public perception This is an insider's look at what is right and what is wrong with the media's attitudes toward their work played against public and government expectations
