## **Bi Personal Field Experiences In Child Analysis:**

**The Bi-Personal Field** Antonino Ferro,2003-09-02 Antonino Ferro sets out his new conceptual system for analysis considering not only the inner world of the patient but the continued interaction of that world with the inner world of the analyst

**In the Analyst's Consulting Room** Antonino Ferro,2013-12-16 In *The Bi Personal Field Experiences in Child Analysis* Antonino Ferro devised a new model of the relationship between patient and analyst In the Analyst's Consulting Room complements and develops this model by concentrating on adults From the standpoint of the analytic field Antonino Ferro explores basic psychoanalytic concepts such as criteria for analysability and ending the analysis transformations that occur during the session the impasse and negative therapeutic reactions sexuality and setting The author explores certain themes in greater depth including ways in which characters that appear during sessions can be interpreted continual indications given by the patient during the emotional upheavals of the field the function of narrator which the analyst takes on to mark the boundaries of the possible worlds Through clinical narrative Ferro renders Bion's often complex ideas in a very personal and accessible way making this book invaluable for psychoanalysts psychotherapists psychiatrists and psychologists

**Metaphor and Fields** S. Montana Katz,2013-01-03 *Metaphor and Fields* is an explanation and demonstration of the value of metaphoric processes and fields in psychoanalysis In this book Montana Katz articulates a future direction for psychoanalysis which is progressively explored taking into account features essential to psychoanalysts of all persuasions clinically and theoretically In this way psychoanalysis is brought into the postmodern future by fashioning an umbrella for the discipline With this umbrella the barriers to mutual understanding may be dismantled and a path permanently forged to the possibility of meaningful international intercultural interdisciplinary and poly perspectival psychoanalytic exchange *Metaphor and Fields* organically merges work on metaphoric processes with work on fields The use of a framework with metaphoric processes and fields combined exhibits the uniqueness of psychoanalysis and shows how it explores and explains human experience The relational fields of the North American school of relational theory intersubjective matrices self object matrices and the ground breaking work of Madeleine and Willy Baranger are all examples of field concepts that have been successfully employed in theoretical frameworks and clinical technique They show how other schools of thought can be understood as using an implicit field concept The chapters in this book approach the subject from diverse vantage points Taken together they form an intricate web of psychoanalytic thought that moves the scope of psychoanalysis beyond dispute towards the open inclusive discussion of core concepts and technique *Metaphor and Fields* will be of interest to psychoanalysts psychiatrists mental health clinicians psychologists social workers and a wide academic audience drawn from the fields of philosophy linguistics comparative literature anthropology and sociology

**Psychoanalysis with Adolescents and Children** Mary T. Brady,2024-12-23 In *Psychoanalysis with Adolescents and Children* Learning to Surf Mary T Brady expertly guides the reader through the challenging and vital process of working with

young analysands Brady likens the experience to learning to surf While finding Bion's metaphor that the analyst must be able to think under fire useful she suggests learning to surf is more apt in psychoanalysis with adolescents and children Drawing on this metaphor throughout the volume she describes how the adolescent can be potentially upended injured or even killed by emotional waves too tumultuous to manage Surfing also evokes the often uneasy but sometimes thrilling balances of adolescence Using clinical vignettes from her extensive experience in the field Brady explores how to work with young people experiencing issues such as eating disorders gender challenges parental substance abuse and the impact of the COVID 19 pandemic Drawing on Bionian Field Theory as well as the work of Donald Winnicott she explores how analysts can surf with the adolescent or child in navigating the ebb and flow of psychic life and development This book is essential reading for psychoanalysts and psychotherapists including psychiatrists psychologists therapists and counselors who treat children and adolescents

**Supervision in Psychoanalysis** Antonino Ferro, 2013-04-17 This book originates from a series of clinical supervisions that were held at the Sao Paulo Institute of Psychoanalysis by Antonino Ferro Supervision in Psychoanalysis The Sao Paulo Seminars reproduces the dialogues in the seminars that followed these supervisions in their entirety The transcripts of eight supervised clinical sessions along with the author's comments allows the reader to see the different styles of the presenting analysts first hand understand the evaluation of Bion's thinking as developed by the author With detailed exposure of clinical sessions their supervision and clarification of the theoretical model of the supervisor this book will be of interest to psychologists psychotherapists and psychoanalysts

This third edition highlights his evolution from a more traditional epistemological knowing approach with its emphasis on interpretation and insight to a more ontological being framework He explores a more intuitive and unconscious way of working and argues this is more developmentally appropriate to children and adolescents His accessible writing style transports the reader into his clinical world a world full of fascinating stories of children talking through their play of adolescents exploring who they are through their discussions about music films sport and computer games of helping parents to understand and thoughtfully manage their child s emotional struggles This new edition an amalgam of theoretical orientations Kleinian Bionian Winnicottian relational non linear and neurological draws from recent developments both in theory and technique It will be of immense value to psychotherapists psychoanalysts and all those involved in the treatment of children s mental health

**Psychoanalysis as a Journey** Franco Borgogno,2007 This book brings together twelve of Franco Borgogno s essays written since 1981 Revised and brought up to date for this edition they give the reader an idea of the development of his philosophical and working stance as he has progressed from being a trainee to becoming a training analyst Psychoanalysis as a Journey is a title which perfectly mirrors the essays it contains the reference is to the journey of insights in the minds of the pioneers of psychoanalysis Freud in particular but also Ferenczi Heimann Bion the journey made by their legacy in psychoanalytic institutions the journey made by the analyst as he grows learns and applies what he has learnt and also the journey of the patient A highly stimulating and thought provoking volume It is quite rare to come across a book that combines sound theoretical and clinical psychological arguments with generous disclosure of the progression and development of an author s thought What this volume offers however is just such an itinerary or rather journey and moreover one that is strictly psychoanalytic Different levels of this journey emerge as we read The first is that of Freud s theoretical development from his first intuitions that led to the creation of psychoanalysis to the key works of his maturity Another concerns the vicissitudes of every psychoanalytic process as manifested in the analyst patient interaction A further level of this journey is the evolution of the analytic thought of Franco Borgogno himself as reflected in the sequence of papers he presents to us here and the highly involving theoretical odyssey they prove to be Book jacket

primitive mental states Ferro s Field Theory operationalizes Bion s concept of an analyst who is not the repository of the truth but is instead one who has the capacity to listen to dwell in doubt to utilize reverie humor and play and facilitate the transformation of previously unthinkable aspects of the patient s experience into articulatable mental elements such as pictorial images thoughts and dreams Ferro s contributions and their analysis are especially relevant to working with primitive character disorders the difficulties of which lie beyond neurosis and the comfortable reach of the precepts of classical analytic technique Each chapter features detailed clinical examples that explicate and apply post Bionian Field Theory making this book an interesting and useful read for analysts and analytic therapists of all orientations who work with patients in all diagnostic categories Autism Denys Ribas,2006 Ch 1 Hans Asperger s neglected account of autism ch 2 Psychoanalysis and autism ch 3 Cognitivism and autism ch 4 Clinical practice some points of convergence between psychoanalysis and cognitivism ch 5 Re evaluating institutional therapies some questions arising from facilitated communication ch 6 Scientific discoveries and the implications for body and mind Catalog of the Research Library of the Reiss-Davis Child Study Center, Los Angeles, California: A-K Reiss-Davis Child Study Center.
