## **Dna Mystique:**

The DNA Mystique Dorothy Nelkin, M. Susan Lindee, 2010-02-01 The DNA Mystique is a wake up call to all who would dismiss America's love affair with the gene as a merely eccentric obsession In These Times Nelkin and Lindee are to be warmly congratulated for opening up this intriguing field of genetics in popular culture to further study Nature The DNA Mystique suggests that the gene in popular culture draws on scientific ideas but is not constrained by the technical definition of the gene as a section of DNA that codes for a protein In highlighting DNA as it appears in soap operas comic books advertising and other expressions of mass culture the authors propose that these domains provide critical insights into science itself With a new introduction and conclusion this edition will continue to be an engaging accessible and provocative text for the sociology anthropology and bioethics classroom as well as stimulating reading for those generally interested in science and culture

**Playing God?** Ted Peters, 2014-04-04 Since the original publication of Playing God in 1996 three developments in genetic technology have moved to the center of the public conversation about the ethics of human bioengineering Cloning the completion of the human genome project and most recently the controversy over stem cell research have all sparked lively debates among religious thinkers and the makers of public policy In this updated edition Ted Peters illuminates the key issues in these debates and continues to make deft connections between our questions about God and our efforts to manage technological innovations with wisdom

**Critical Race Narratives** Carl Gutierrez-Jones, 2001-08 The beating of Rodney King the killing of Amadou Diallo and the LAPD Rampart Scandal these events have been interpreted by the courts the media and the public in dramatically conflicting ways Critical Race Narratives examines what is at stake in these conflicts and in so doing rethinks racial strife in the United States as a highly charged struggle over different methods of reading and writing Focusing in particular on the practice and theorization of narrative strategies Gutierrez Jones engages many of the most influential texts in the recent race debates including The Bell Curve America in Black and White The Alchemy of Race and Rights and The Mismeasure of Man In the process Critical Race Narratives pursues key questions posed by the texts as they work within or against disciplinary expectations can critical engagements with narrative enable a more democratic dialogue regarding race what promise does such experimentation hold for working through the traumatic legacy of racism in the United States Throughout Critical Race Narratives initiates a timely dialogue between race focused narrative experiment in scholarly writing and similar work in literary texts and popular culture

*The Governance of Genetic Information* Heather Widdows, Caroline Mullen, 2009-09-03 This volume maps the areas of ethical concern in the debate regarding the governance of genetic information and suggests alternative ethical frameworks and models of regulation in order to inform its restructuring Genetic governance is at the heart of medical and scientific developments and is connected to global exploitation issues of commodification commercialisation and ownership the concepts of property and intellectual property and concerns about individual and communal identity Thus the decisions

that are made in the next few years about appropriate models of genetic governance will have knock on effects for other areas of governance In short the final answer to Who Decides in the context of genetic governance will fundamentally shape the ethical constructs of individuals and their networks and relationships in the public sphere

BOOK JACKET *Possessed by the Past* David Lowenthal, 1996 Heritage is a most compelling modern cause In the last quarter century it has expanded from a small elite pastime to a major popular crusade a crusade to save and celebrate anything and all that we inherit from the past Everything from Euro Disney to the Holocaust Museum from Balkan enmities to the Northern Irish troubles from Elvis memorabilia to the Elgin marbles bears the marks of the cult of heritage Heritage attachments pervade politics and education and form our views on such diverse realms as heredity environment racism and tourism Enthralled by the past we deploy it for present benefits of every kind A goodly heritage persuades us we belong to a community of like minded folk and act within a tradition sanctified by age old experience Heritage is all the more valued in a world where turbulent change and global fears make the present seem frightful and the future fearsome Yet the very zeal with which heritage is pursued leads to countless abuses of the treasured past Roots and relics become weapons to foment hatred of others to warp historical truth to deform our own legacy to further some class or cause Despite new recognition that the world s diverse legacies belong to and require the care of all mankind heritage passions remain animated largely by self regarding chauvinism In *Possessed by the Past* David Lowenthal explains the rise of this new obsession with the past and shows its power for both good and evil He probes the passions that generate a need to find or invent a prideful past or to mourn a grievous one and shows how they are similar the world over He demonstrates why and how relics ancestry and memory today more than ever become a source of both pride and peril
