## **Documents Of Life 2 An Invitation To A Critical Humanism:**

*Documents of Life 2* Ken Plummer, 2001-03-20 *Documents of Life* was originally published in 1983 and became a classic text providing both a persuasive argument for a particular approach and a manifesto for social research. As a critique of anti-humanist methodology in the social sciences it championed the use of life stories and other personal documents in research which are now widely used today. This book is a substantially revised and expanded version which takes on recent developments. Providing numerous illustrations from a range of life documents the book traces the history of the method, examines ways of doing life story research and discusses the many political and ethical issues raised by such research. The whole book has been substantially re-written and

**Documents of Life 2** Kenneth Plummer, 2000 *Pragmatic Humanism* Marcus Morgan, 2016-01-29 Is sociology best understood as simply chipping away at our ignorance about society or does it have broader roles and responsibilities? If so to what or perhaps to whom are these responsibilities? Installing humanity as its epistemological and normative start and endpoint, this book shows how humanism recasts sociology as an activity that does not merely do things or effect things but is also self-consciously for something. Rather than resurrecting problematic classical conceptions of humanism, the book instead constructs its arguments on pragmatic grounds, showing how a pragmatic humanism presents an improved picture of both the nature and value of the discipline. This picture is based less around the claim that sociology is capable of providing authoritative revelations about society and more upon its capacity to offer representations of the social in epistemologically open, transformative, ethical and hopeful ways. Ultimately it argues that sociology's real value can only be disclosed by replacing its image as a discipline aimed towards disinterested social enlightenment with one of itself as a practice both dependent upon and at its best self-consciously aimed towards human ends and imperatives. It will appeal to scholars and students across the social sciences and to those working in social theory, sociology and philosophy of the social sciences in particular.

Preface *Disability & the Politics of Education* Susan Lynn Gabel, Scot Danforth, 2008 Disability and the Politics of

Education An International Reader is a rich resource that deals comprehensively with the many aspects of the complex topic of disability studies in education For nearly two decades global attention has been given to education as a human right through global initiatives such as Education for All EFA and the Salamanca Statement Yet according to UNESCO reaching the goals of EFA remains one of the most daunting challenges facing the global community Today millions of the world s disabled children cannot obtain a basic childhood education particularly in countries with limited resources Even in the wealthiest countries many disabled children and youth are educationally segregated from the nondisabled particularly if they are labeled with significant cognitive impairment International agencies such as the United Nations and the World Bank have generated funds for educational development but unfortunately these funds are administered with the assumption that west is best thereby urging developing countries to mimic educational policies in the United States and the United Kingdom in order to prove their aid worthiness This McDonaldization of education reproduces the labeling resource allocation and social dynamics long criticized in disability studies The authors in this volume explore these subjects and other complexities of disability and the politics of education In doing so they demonstrate the importance and usefulness of international perspectives and comparative approaches
